50-or-more-housing-unit mortgaged properties -----

MORTGAGE CHARACTERISTICS

Number of Mortgages

1 mortgage ----- 8 694
2 mortgages ----- 1 554
3 or more mortgages ----- 230

Form of Debt of First Mortgage

Mortgage or deed of trust ----- 9 910
Contract to purchase ----- 108
Wrap-around mortgage ----- 460

Origin of First Mortgage

Mortgage made at time property acquired ----- 4 157
Mortgage assumed at time property acquired ----- 2 194
Mortgage placed later than acquisition of property ----- 4 128
Refinanced mortgage:
Same lender ----- 2 550
Different lender ----- 1 411
Mortgage placed on property owned free and clear of debt ----- 166

Purpose of First Mortgage Placed Later Than Acquisition of Property

Mortgages placed later than acquisition of property ----- 4 128
Renew or extend loan that had fallen due, without increasing the outstanding balance ----- 1 706
Secure better terms ----- 558
Provide funds for additions, improvements, or repairs to this property ----- 432
Provide funds for investment in other real estate ----- 239
Provide funds for other types of investments ----- 79
Provide funds for educational or medical expenses -----
Other reasons ----- 139
Not reported ----- 974

Purpose of Second Mortgage Placed Later Than Acquisition of Property

Second mortgages placed later than acquisition of property ----- 608
Provide funds for additions, improvements or repairs to this property ----- 220
Provide funds for investment in other real estate ----- 40
Provide funds for other types of investments ----- 12
Provide funds for educational or medical expenses -----
Other reasons ----- 124
Not reported ----- 213

Year First Mortgage Made or Assumed

MORTGAGE PAYMENTS AND OTHER EXPENSES

Method of Payment of First Mortgage

Regular payments of interest and/or principal

Interest and principal _____
Fully amortized _____
Partially amortized _____

Principal only _____
Fully amortized _____
Partially amortized _____

Interest only _____

No regular payments required _____

Items Included in First Mortgage Payment

Regular payments of both interest and principal _____
 Real estate taxes and property insurance _____
 With no other items _____
 With other items _____
 Real estate taxes only _____
 Property insurance only _____
 Other combinations or no other items _____
 No regular payments of interest and principal _____

**Monthly Interest and Principal Payments on First Mortgage
Per Housing Unit**

Regular monthly payments of interest and/or principal

Less than \$60 _____
\$60 to \$79 _____
\$80 to \$99 _____
\$100 to \$149 _____
\$150 to \$199 _____
\$200 to \$249 _____

UNITED STATES

The 50 States and the District of Columbia are the constituent units of the United States.

STANDARD METROPOLITAN STATISTICAL AREAS

The general concept of a metropolitan area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. The standard metropolitan statistical area (SMSA) classification is a statistical standard, developed for use by Federal agencies in the production, analysis, and publication of data on metropolitan areas. The SMSA's are designated and defined by the Office of Management and Budget following a set of official published standards developed by the inter-agency Federal Committee on Standard Metropolitan Statistical Areas.

Each SMSA has one or more central counties containing the area's main population concentration: an urbanized area with at least 50,000 inhabitants. An SMSA may also include outlying counties which have close economic and social relationships with the central counties. The outlying counties must have a specified level of commuting to the central counties and must also meet certain standards regarding metropolitan charac-

ter, such as population density, urban population, and population growth. In New England, SMSA's are composed of cities and towns rather than whole counties.

Each SMSA except one (Nassau-Suffolk, N.Y.) has at least one central city. The titles of SMSA's include up to three city names, as well as the name of each State into which the SMSA extends. For the 1980 census, central cities of SMSA's are those named in the titles of the SMSA's, with the exception of Nassau-Suffolk, N.Y., which has no central city and Northeast Pennsylvania, the central cities of which are Scranton, Wilkes-Barre, and Hazleton. Data on central cities of SMSA's include the entire population and housing within the legal city boundaries. In Hawaii, where there are no incorporated places recognized by the Bureau of the Census, census designated places are recognized as central cities.

New standards for designating and defining metropolitan statistical areas were published in the Federal Register on January 3, 1980. The SMSA's recognized for the 1980 census comprise (1) all areas as defined on January 1, 1980, except for one area which was defined provisionally during the 1970's on the basis of population estimates but whose qualification was not confirmed by 1980 census counts; and (2) a group of 36 new areas defined on the basis of 1980 census counts and the new standards that were published on January 3, 1980.

When data on commuting flows become available for 1980 census tabulations, the new standards will be applied to the areas existing on January 1, 1980, and the boundaries, definitions, and titles for all SMSA's will be reviewed.

To aid users who want to become familiar with the SMSA standards and how they are applied, documents are

available from the Office of Management and Budget, Washington, D.C. 20503.

PLACES

Size of place as shown in this report is based on the 1980 census population figures.

Two types of places are recognized in the census reports—incorporated places and census designated places—as defined below.

Incorporated Places—Incorporated places are those which are incorporated under the laws of their respective States as cities, boroughs, towns, and villages, with the following exceptions: boroughs in Alaska and New York, and towns in the six New England States, New York, and Wisconsin. The towns in the New England States, New York, and Wisconsin, and the boroughs in New York are recognized as minor civil divisions (MCD's) for census purposes. The boroughs in Alaska are county equivalents.

Census Designated Places—As in the 1950, 1960, and 1970 censuses, the Census Bureau has delineated boundaries for closely settled population centers without corporate limits. In 1980 each such place is known as a "census designated place" (CDP). In the 1970 and earlier censuses, these places were known as "unincorporated places."

Census designated place boundaries change with changes in the settlement pattern; a place which has the same name as in previous censuses does not necessarily have the same boundaries. Boundary outlines for CDP's appear on the county subdivision map in the HC80-1-A, *General Housing Characteristics* reports for States. Detailed maps of these places are available for purchase from the Census Bureau.

URBAN AND RURAL RESIDENCE

As defined for the 1980 census, urban housing comprises all housing units in urbanized areas and in places of 2,500 or more inhabitants outside urbanized areas. More specifically, urban housing consists of all housing units in (1) places of 2,500

or more inhabitants incorporated as cities, villages, boroughs (except in Alaska and New York), and towns (except in the New England States, New York, and Wisconsin), but excluding those housing units in the rural portions of extended cities; (2) census designated places of 2,500 or more inhabitants; and (3) other territory, incorporated or unincorporated,

included in urbanized areas. Housing units not classified as urban constitutes rural housing. Information on the historical development of the urban-rural residence definition appears in the 1980 Census of Population report, *Characteristics of the Population, Number of Inhabitants*, PC80-1-A.

PROPERTY CLASSIFICATIONS

Property—In the 1981 Residential Finance Survey, a mortgaged property is defined as all of the buildings and land covered by a single first mortgage. Usually, all land and buildings covered by a single first mortgage are adjacent to each other, but in some cases, the buildings and land under a single mortgage are scattered.

If a rental project or development was divided into sections, each securing a separate first mortgage, each section is

considered a separate property. Thus, in the case of mortgaged properties, the number of properties is the same as the number of first mortgages.

If the property was not mortgaged, the property was defined by the owner.

Nonfarm—For purposes of this survey, a property was classified as nonfarm if it had 1 to 4 housing units and was on a place of less than 10 acres or if it had 5 or more units. Properties which were essentially farms were not included. This differs from the 1980 census definition of rural farm and nonfarm units. In the census, occupied housing units are classified as farm units if the place has one acre or more from which at least \$1,000 worth of agricultural products were sold in 1979; thus, rural units which did not meet these qualifications were classified as nonfarm.

Housing Unit—A housing unit is a house, an apartment, a group of rooms, or a single room occupied or, if vacant, intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building and which have direct access from the outside of the building or through a common hall. The definition of "housing unit" is the same as that used in the 1980 census.

Residential—A property was considered residential if 50 percent or more of the floor space is used for residential purposes. If the owner indicated that the property consisted primarily of buildings or land which were essentially non-residential in character, the property was considered nonresidential and out of the scope of this survey.

In the 1981 Residential Finance Survey, residential properties were divided

into three categories: homeowner, condominium, and rental and vacant properties.

Homeowner property. A homeowner property is one with one to four housing units, at least one of which is occupied by the owner. All housing units on the property were included in the count, regardless of the number of structures in which they were located. Persons buying property and still owing money were considered owners, whether or not they had legal title to the property.

Condominium property. A condominium involves ownership that enables a person to own an apartment or house in a development of similar units and to hold a common or joint ownership in common areas; i.e., hallways, entrances, elevators, etc. The owner has a deed to the individual unit, and very likely, a mortgage on the unit. In the Residential Finance Survey, condominium properties contain only one housing unit by definition. Data are presented only for condominium units which were owner-occupied.

Rental and vacant property. The term "rental and vacant" applies to properties with five housing units or more (even though one of the units may be occupied by an owner) and to properties with one to four housing units, all of which are either renter-occupied or vacant.

Rental and vacant refers to properties, not housing units. A multiunit property may contain both renter-occupied and vacant housing units. A single-unit property may be either renter-occupied or vacant. The determination of whether the property was to be included in the category "Rental and vacant" was made on the basis of the respondent's reply to the question, "Does the owner live on this property?" If the answer was "No," the property was classified as "Rental and vacant." If the respondent's reply was "Yes" (i.e., the owner lived on the property), but the property contained five housing units or more, the property was also included in this category.

Cooperatively owned properties are also classified as "rental and vacant."

Properties Excluded—This report excludes the following types of properties:

1. Properties with fewer than 5 units on a place of 10 or more acres. Therefore, all properties with 5 or more housing units are included in the survey even though they may be on 10 or more acres; for example, a large garden apartment project.
2. Mobile homes, trailers, or mobile home parks.
3. Publicly owned properties, including low- and middle-income housing properties owned by local housing authorities and other government agencies, investment housing owned by government agencies (e.g., State universities), properties owned by government agencies for the use of their employees, and government-owned housing for armed services personnel. Not included in the category "Publicly owned" are properties acquired by the Federal Housing Administration as a result of mortgage defaults and being held temporarily by that agency pending sale to new owners. Such properties were deemed part of the private housing inventory.
4. Hotels or motels with 50 percent or more of the accommodations reserved for transient use.
5. Properties with more than 50 percent of the floor space used for business or industrial purposes. Also excluded were mortgaged properties in which the mortgage also covered a structure nonresidential in character; for example, a parsonage was excluded if the mortgage also covered a church.
6. Properties under construction at the time of the April 1980 decennial census with no living quarters sufficiently completed to permit inclusion in the census enumeration. Since the 1980 decennial census records were the universe from which the 1981 Residential Finance Survey sample was selected, these properties were automatically excluded from the survey.

7. Properties which did not contain housing units at the time of the Residential Finance Survey due to such events as fire or storm destruction, rehabilitation, conversion to nonresidential use, and properties in which all of the buildings were demolished or scheduled to be demolished.
8. Individual units in condominium projects which were vacant or rented.
9. The rental portion of buildings being converted from rental units to condominium units at the time of the survey.
10. Properties which were for seasonal use only and were vacant at the time of the survey.

Mortgage Status—In this survey, properties were classified as mortgaged or nonmortgaged on the basis of information furnished by the owner and the lender. The homeowner was asked to report all of the various types of debt outstanding on the property. However, only mortgages were included in this survey. If there was any doubt as to whether or not a debt was a mortgage, the lender was asked to confirm.

As used in this report, "mortgage" refers to all forms of debt where the property is pledged as security for repayment of the debt. It includes such debt instruments as deeds of trust, trust deeds, mortgage bonds, and vendor liens. In such arrangements, the borrower generally has the title to the property.

Also included as mortgages are such debt arrangements as contracts to purchase, contracts for deeds, assumption agreements, and land contracts. These differ from mortgages or deeds of trust in that title to the property remains with the lender, who generally is also the seller (i.e., former owner) of the property. The buyer has the right to occupy the property so long as he/she makes the payments on the debt. Title to the property passes to the buyer when he/she has paid the full or a stipulated amount on the loan. For purposes of this survey, the buyer is considered the "owner." When a property being purchased under a land or purchase contract is also covered by an

outstanding first mortgage made by the former owner, data are shown for the underlying mortgage only if the current owner has assumed the obligation for the payments.

In some cases, the owner of the building did not own the land but had a leasehold mortgage on the building only. For purposes of this survey, leasehold mortgages were treated in the same manner as any other mortgage.

To assure that all mortgage-type debts on the property were reported, the owner was asked to report all debts outstanding on the property. In the editing process, however, the following types of debt were classified as nonmortgages: Property improvement loans, such as FHA Title 1 loans not secured by the property; chattel mortgages (e.g., mortgages on furniture or equipment); mechanics and tax liens; and judgment liens arising from a lawsuit against the property owner. Properties having only the latter types of debt and no mortgage debt were classified as nonmortgages.

To obtain confirmation of the mortgage status of the property and additional information about the mortgage, the Form D-1612 questionnaire was mailed to each lender to whom, according to the owner, mortgage payments were made. If the debt was other than a mortgage, this information was to be reported by the lender on the D-1612 questionnaire. Also eliminated on the basis of the lender's replies were mortgage debts that had been paid off or otherwise terminated prior to the survey period.

MORTGAGE CHARACTERISTICS

Type of Mortgage (First and Junior Mortgages)—A mortgage is classified as a first mortgage if it has prior claim over any other mortgage on the property or if it is the only mortgage on the property. All other mortgages (second, third, etc.) are classified as "junior." A second mortgage is a junior mortgage which gives the lender a claim against the property which is second to the claim of the holder of the first mortgage. Any other junior mortgage(s) would be subordinate to the second mortgage.

Mortgages known as wrap-around mortgages, although technically junior mortgages, are considered first mortgages for the purpose of this report. A wrap-

around mortgage is a junior mortgage whose face value encompasses the unpaid balance of the first mortgage (and any earlier junior mortgages) plus the amount of any new funds extended by the wrap-around lender. The interest rate on the wrap-around mortgage is higher than the interest rate on the underlying first mortgage, but usually lower than the current mortgage interest rate on similar properties. When a property is financed under a wrap-around mortgage, data are shown for the wrap-around mortgage only and not for the underlying mortgage or mortgages.

Mortgage Insurance Status—This item refers to the presence or absence of guaranty or insurance on a mortgage. Under a mortgage insurance program, the mortgage holder is assured of full or partial compensation of the unpaid balance if the borrower defaults on the mortgage payments. Mortgages may be insured either by an agency of the Federal government or by a private mortgage insurance company.

FHA-insured mortgages are mortgages made by private lending institutions and insured by the Federal Housing Administration.

VA-guaranteed or insured mortgages (GI loans) are those guaranteed or insured by the Veterans Administration and are made to eligible veterans who served after September 15, 1940, by private lenders for purposes of homeownership. Some of the properties with VA mortgages are owned by nonveterans who have assumed the mortgages.

Insured conventional mortgages are those insured by a private mortgage insurance company. Private mortgage insurance companies will, for a fee, issue insurance on mortgage loans similar to FHA and VA insurance, although usually not insuring as great a percentage of the loan.

All other conventional mortgages are those other than FHA insured, VA guaranteed or insured, or privately insured.

Included in the "All other conventional" mortgage category are housing loans made directly by the

Federal Housing Administration, the Veterans Administration, the Farmers Home Administration, or any other Federal, State, or local government agency as the lender. Direct loans are made by the Veterans Administration in most cases only when the veteran is unable to obtain mortgage funds from private lenders at suitable terms in his/her area. Direct loans by the Federal Housing Administration are relatively rare and usually occur when FHA has to sell a property which it has acquired as a result of borrower default.

The Farmers Home Administration makes direct loans on home and rental and cooperative housing in rural areas for eligible borrowers. These loans may then be sold to investors, with Farmers Home Administration insurance. They are included here because there were too few in the survey to tabulate separately.

The mortgage insurance status question was asked of both the owner and the lender. In a very few cases, neither respondent answered this question. In these cases, the mortgages were classified in the "All other conventional" mortgage category.

Origin of Mortgage—This item indicates whether the first mortgage currently on the property was (1) made by the current owner at the same time the property was acquired; (2) assumed by the current owner at the time of acquisition (i.e., the mortgage was on the property before acquisition by the current owner, who "assumed" the obligation of the unpaid balance of that mortgage); or (3) placed by the current owner after the property was acquired. These categories are defined as follows:

Mortgage made at time property acquired indicates that the present first mortgage is the same as originally made by the present owner when the property was acquired and has not been refinanced, renewed, or extended.

Mortgage assumed at time property acquired indicates that the present first mortgage is the same mortgage that was assumed from the previous owner when the property was acquired and has not been refinanced.

Mortgage placed later than acquisition indicates that the current mortgage is not the mortgage placed on the property at the time the present owner acquired the property. This category includes refinanced and renewed mortgages and mortgages placed on properties owned free and clear of debt at the time the mortgage was placed.

A refinanced mortgage consists of replacing an existing mortgage with a new mortgage. This may be done with the same lender or with a different lender. The principal balance may or may not be changed. Renewing or extending a mortgage means that a lender agrees to extend the terms of a mortgage having an outstanding principal balance for a specified additional period of time. In the tables, renewed mortgages are included with refinanced mortgages.

The category "Mortgages placed on properties owned free and clear of debt" consists of properties that were previously acquired without a mortgage and those properties with mortgages placed at the time of acquisition but since paid off.

Purpose of First Mortgage Placed Later Than Acquisition of Property—Reasons reported for placing a first mortgage after acquisition of the property are as follows:

1. To renew or extend a loan that has fallen due without increasing the outstanding balance; i.e., without the borrower obtaining additional money.
2. To secure better terms, such as a lower interest rate, a longer term of years for repayment, smaller required payments, etc.
3. To provide money for such purposes as additions, improvements or repairs to the property, investment in other real estate, other types of investments, educational expenses such as college education for the children, medical expenses, or other reasons as described by the respondent.

Purpose of Second Mortgage Placed Later Than Acquisition of Property—This item refers only to reasons for placing a *second* mortgage later than acquisition. Reasons include: To provide funds for such pur-

poses as additions, improvements or repairs to the property, investment in other real estate, other types of investments, educational expenses such as college education for the children, medical expenses, or other reasons as described by the respondent.

Year Mortgage Made or Assumed—This refers to the year the current mortgage was made or assumed by the current property owner. If the current mortgage had been refinanced or renewed, the year of the most recent refinancing or renewal is shown.

Characteristics shown in this report for mortgages made or assumed in any given year and in existence at the time these data were collected do not necessarily reflect the characteristics of all mortgages made in that year. Mortgages assumed in a particular year represent mortgages originally made in previous years. Moreover, many mortgages made in previous years had been paid off or otherwise terminated by the time of this survey.

The year the mortgage was made was asked of both the owner and the lender. In the case of an assumed mortgage, if the assumption date was not reported by the lender, the date reported by the owner was used.

Mortgage Loan—The mortgage loan is the amount of the loan at the time it was obtained by the current property owner. If the mortgage was assumed from the previous owner, the mortgage loan is the unpaid balance when assumed. If the owner made a new mortgage, the mortgage loan is the face amount of that mortgage. When the mortgage represented a refinancing or extension of the previous mortgage, the mortgage loan is the amount of the new mortgage. The amount of the mortgage loan was asked of both the owner and the lender. In the case of an assumed mortgage, if the assumption amount was not reported by the lender, the amount reported by the owner was used.

"Total mortgage loan" is the total amount of loan on the property, regardless of the number of mortgages. When there are two mortgages or more, the amount of first and junior loans are combined, although they may have been made at different times.

Mortgage Outstanding Debt—Mortgage outstanding debt is the unpaid principal balance of the mortgage at the time of the survey. In some instances, it also includes overdue or deferred interest. "Total outstanding debt" is the sum of the unpaid balances of all mortgages on the property.

Interest Rate—Interest rate is the annual rate specified in the mortgage or the annual equivalent if not on an annual basis. Where the rate varies during different periods of the life of the mortgage, the rate at the time of interview is shown. No fees or charges, such as the FHA mortgage insurance premiums, are included. When no interest was charged, the property appears in the lowest interval, "Less than 5.0 percent."

Variable Interest Rate—The intent of this item was to identify mortgages whose interest rates could be changed during the life of the mortgage. The lender was asked if the interest rate could change. If the answer was "yes," the lender was asked if the present rate was higher, lower, or the same as when the mortgage was made. Analysis of the extent interest rates can change should take into consideration these data and the data on *Reason for Change in Mortgage Rate*.

Reason for Change in Mortgage Rate—This item is presented for mortgages with a variable interest rate as reported by the lender. More than one reason could be given for this item; therefore, the figures may not add to total. The reasons for change in mortgage rate include the following:

1. *Rate renegotiated periodically.* This category refers to loans for which the interest and monthly payments are renegotiated after a period of years. The interest rate is then adjusted according to current market conditions.
2. *Rate changes tied to market index.* The interest rate for these mortgages is tied to some reference index that reflects changes in market rates of interest. Constraints may be placed on the frequency and amount of the rate increase.

3. *When mortgage is assumed.* This category pertains to mortgages that contain a clause that allows an interest rate change if the mortgage is assumed.

4. *When payments become delinquent.* This refers to mortgages that contain a clause which allows an interest rate change if the borrower becomes delinquent in his/her payments.

5. *Other.* This category includes reasons specified by the lender that could not be included in the categories above.

Graduated Interest and Principal Payments—This item pertains to mortgage plans that allow monthly payments (principal and interest) to change during the term of the mortgage by means other than a change in interest rate. Mortgage plans that allow such changes are often called Graduated Payment Mortgages (GPM's). These mortgages begin with lower payments which rise later in the life of the mortgage. The graduation date and term may or may not be fixed throughout the life of the mortgage.

Data are shown on whether the payments under mortgage plans of this type increase yearly for the first 5 years or increase yearly for the first 10 years. The category "Payments change in some other way" includes terms specified by the lender, if different from the categories above.

The intent of this question was to identify mortgages allowing lower monthly payments (principal and interest) during the early years of the mortgage with higher payments later in the life of the mortgage. The lower payments are accomplished by deferring some or all of the principal and interest due, but do not involve a change in interest rates. The frequency of mortgages with graduated payments may be overstated. There were indications that some lenders misunderstood the intent of this question. Some respondents answered "yes" to this question but qualified it by notes such as "if real estate taxes go up" or "if terms renegotiated."

Term of Mortgage—For most mortgages, the term is the length of time required to pay back the principal in regular periodic payments and is usually stated in the

mortgage document. For an assumed mortgage, the term shown is the original term. No routine edit was made to determine whether mortgages requiring regular periodic payments would be paid off during the specified term.

There were other types of term arrangements reported by lenders. If the lender did not report a specific term, but entered "until paid" or a similar phrase, and regular payments of principal were required, the effective term was computed.

Some mortgages are written with short terms and are either renewable at the option of the lender or contain renewal clauses which require the lender, under most circumstances, to extend the mortgage term. These were reported in different ways by lenders. A few mortgages appeared to have been long since past due. In these cases, particularly with lenders who were individuals, the stated term may have had little meaning.

The classification "no stated term" includes the following types of arrangements:

1. The lender reported that the mortgage had no specific term and that no regular principal payments were required.
2. The lender reported the term of the mortgage as "until paid" and there were no regular principal payments.
3. "On demand" mortgages due at any time on demand of the lender. During the life of such mortgages, interest payments usually are required; principal payments may or may not be required.

Unexpired Term of Mortgage—This item refers to the years remaining before the mortgage is paid in full or the outstanding balance becomes due and payable. The figures were derived by adding the term to the year the mortgage was made and subtracting the survey reference year—1981. The category "No stated term or not computed" includes assumed mortgages.

Holder of Mortgage—This refers to the firm, organization, institution, or person that has the legal right to the interest and principal due on the mortgage.

The mortgage holder is not necessarily the original mortgage lender since the

original lender may have transferred the mortgage to a new holder. Mortgages are frequently originated by one firm (or person) as agent or loan correspondent for another firm or organization which provides the mortgage funds, or mortgages are sold by the originating lenders to firms or organizations which have funds available for investment. The firm to which the mortgage payments are made is not always the mortgage holder, since payments are frequently made through a firm acting as a collecting or servicing agent for the holder.

Information on mortgage holder was obtained from the mortgage holder or the agent of the holder.

1. *Commercial bank or trust company.*

This type of bank offers many financial services; e.g., commercial and industrial loans, personal loans, checking accounts, savings accounts, and residential mortgage loans. If a bank has invested its regular funds in a mortgage for its own account, the mortgage is shown as being held by a "Commercial bank or trust company." If a bank has invested the funds of a trust account (e.g., funds available from an estate being administered by the bank for a customer) or the funds of a conventional mortgage pool(s) not guaranteed by GNMA or FHLMC, in a mortgage, the case is included in the category "Other."

2. *Mutual savings bank.* These institutions are owned by their depositors. At one time this type of bank accepted savings deposits only; however, currently these institutions provide essentially the same financial services as commercial banks. Banks of this type are located principally in the New England States, New York, and Pennsylvania.

3. *Savings and loan association.* This type of institution invests the savings of its depositors in mortgage loans, principally on homes. Included in this category are building and loan associations and homestead associations.

4. *Life insurance company.* A life insurance company may use premiums received from policy holders and earnings received from investments to make loans secured by real estate.

5. *Mortgage company.* This type of firm is engaged primarily in the business of originating and selling mortgages. Mortgages which are shown as being held by mortgage companies in this report represent mortgages recently made and not yet sold and those in which the mortgage company had invested its own funds.

6. *Federal agency.* The principal types of agencies included in this category are:

- a. *Government National Mortgage Association (GNMA)*—This agency purchases mortgages insured by FHA or guaranteed or insured by VA on specified types of housing—mainly housing for low- and moderate-income families, cooperative projects, and other special purpose housing for which regular mortgage market financing is inadequate. GNMA also holds mortgages acquired from the Federal National Mortgage Association (FNMA) as a result of assuming FNMA's management and liquidation functions.
- b. *Federal Housing Administration (FHA)*—This agency becomes the holder of a mortgage as a result of procedures that are followed when a borrower defaults on a FHA-insured mortgage.
- c. *Veteran Administration (VA)*—Mortgages held by this agency include those made by the VA under its direct loan program and mortgages made in connection with the sale of properties acquired by VA from lenders because of borrower defaults on VA-guaranteed loans.

7. *Federally secured pool.* Federally secured pools hold mortgages financed by securities guaranteed by the Government National Mortgage Association (GNMA), the Federal Home Loan Mortgage Corporation (FHLMC) or the Farmers Home Administration (FmHA). Mortgages in a pool are part of a group of mortgages whose principal and interest payments are guaranteed by GNMA, FHLMC or FmHA and which are held in trust for delivery under certain conditions to GNMA, FHLMC or FmHA.

8. *Federal National Mortgage Association (FNMA, also known as "Fanny Mae").* This government-sponsored organization buys and sells FHA-insured, VA-guaranteed, and conventional mortgages to improve distribution of mortgage funds and to encourage construction of housing.

9. *Real estate or construction company.* Neither of these two types of holders is primarily in the mortgage business. Their mortgage activity is usually an adjunct to the buying and selling of real estate or the building of homes. These firms may hold mortgages for short periods of time until they can be sold to investors.

10. *Individual or individual's estate.* Included in this category are mortgages held by individual persons or estates of individuals. Excluded are individual's estates being administered as trust accounts by commercial banks.

11. *Other.* Includes retirement funds, State and local governments or private pension systems, nonprofit organizations, insurance companies not classified as life insurance companies, trust accounts administered by a bank, conventional mortgage pools (those not guaranteed by GNMA, FHLMC, or FmHA), finance companies, and other holders who do not fit into the above categories.

Location of Mortgage Holder—This item relates the location of the first mortgage holder to the location of the mortgaged property. For each region, first mortgages are shown on the basis of whether the holder at the time of the survey was in the same geographic region, in a different geographic region, or outside the United States.

The State location of the principal address of the lender was asked of the lender or its agent. No attempt was made to edit replies in terms of whether or not the respondent answered for headquarter offices, except that Federal agencies, Federally secured pools, and the Federal National Mortgage Association (as holders) were assumed to be in Washington, D.C. (the South region) regardless of the respondent's reply.

Servicing of Mortgage—"Servicing" a mortgage involves collection of the mortgage payments from the borrower, maintaining records of payments, setting up escrow accounts for accumulating the real estate tax and property insurance portions of mortgage payments (when included in the payment), paying the tax and insurance bills, and sending required notices to the borrower.

A mortgage may be serviced by the holder or by an agent for the holder. Insurance companies and banks which invest in mortgages over a wide geographical area generally arrange for servicing of their mortgages by local servicers. These are frequently the local mortgage companies or banks which originated the mortgages. Individuals who invest in mortgages may arrange for the servicing of these mortgages by a bank or mortgage company. The servicing bank or mortgage company charges the holder a fee for performing this service.

Holder's Acquisition of Mortgage—This item indicates how the present holder of the mortgage acquired it. Holders usually acquire mortgages in one of two ways:

1. They can originate the mortgage directly from the borrower with no intermediary agent.
2. They can purchase the mortgage from a previous holder.

Purchased mortgages are further classified as to whether the mortgage was purchased from the present servicer or purchased from someone else. It is common practice for a mortgage company to originate mortgages and then sell them to investors, such as life insurance companies. Many times, the mortgage company will continue to service the mortgages that have been sold to the investor.

Mortgage Assumption—This item refers to the absence or presence of a clause in the mortgage which permits assumption of the mortgage only with the lender's permission.

Prepayment Penalties—A mortgage is classified as having "prepayment penalties" if it contains a clause which requires a fee or percentage of the outstanding loan to be paid if the mortgage is paid in full before the term of the mortgage expires.

Mortgage Loan as Percent of Purchase Price—

This percentage was computed for the first mortgage loan and for all mortgage loans on the property. The percentage is shown only when the first mortgage was made or assumed at the time the property was acquired by purchase or construction. For total mortgage loan the amounts of the first and junior loans were combined, even though they may have been made at different times.

Outstanding Debt as Percent of Value—

The percentage was computed separately for the first mortgage and for all mortgages on the property.

MORTGAGE PAYMENTS AND OTHER EXPENSES

Method of Payment—This refers to the payment arrangements required under the terms of the mortgage. Mortgage payments in this report are classified according to whether or not regular payments are required. Mortgages with "regular payments required" are further classified by the method of payment and whether these payments reflect full or partial amortization.

Interest and principal. This category includes regular payments of both interest and principal even if payments are made for different intervals; e.g., interest paid monthly and principal paid quarterly.

Principal only. A few mortgages were reported on which principal payments only were required. These were primarily short-term mortgages on which all interest was due in a lump sum at the end of the term or mortgages on which no interest was being charged.

Interest only. Included in this category are mortgages on which principal was not being paid at the time of the survey. In some cases this is a temporary situation and payments for principal were required in the past or will be required later.

No regular payment required. A few mortgages were reported on which no regular payments were required for interest or principal. With respect to

small properties, some of these mortgages involved borrowers and lenders who were related. Some mortgages on large rental properties involve unusual financing arrangements. Occasionally the holder of the mortgage and the owner of the property are different firms with the same principals.

Amortized loan. The amount of the loan is paid back in installments, usually including payments to principal and interest, at regular intervals (monthly, quarterly, etc.).

Fully amortized. The principal payments are sufficient to pay off the loan completely within the stated term of the loan.

Partially amortized. The principal payments pay off part, but not all, of the loan by the end of its term. The remainder of the loan then becomes due and is paid off in one lump sum, refinanced with a new loan, or extended by renewal of the loan.

Items Included in Mortgage Payments—Mortgages with regular required payments of both interest and principal are further classified by the other items which the owner is required to pay as part of the mortgage payment. In addition to real estate taxes and property insurance payments, a mortgage payment may also include such items as mortgage insurance premium, mortgage service charge, ground rent, equipment replacement reserve, and life insurance premiums. Payments on FHA-insured mortgages, for example, usually include real estate taxes, property insurance premiums, and FHA mortgage insurance premiums.

Monthly Interest and Principal Payments—This is the amount required to be paid regularly on the mortgage for principal repayment or interest, or both. Therefore, mortgages with no required regular payments are excluded. Principal and interest payments are shown on a monthly basis, regardless of the actual frequency of payment. Data are shown for first mortgage payments and for total mortgage payments.

Current Status of Mortgage Payments—A mortgage is classified "delinquent" when

the required payments are past due 30 days or more. When payments were delinquent, mortgages were classified as to the number of payments past due. Mortgages delinquent by four or more payments are shown by whether or not foreclosure proceedings had begun or were in process at the time of the survey.

Selected Monthly Owner Costs (Homeowner and condominium properties)—This amount is the sum of payments for real estate taxes, special assessments (if any), property insurance, utilities, fuel, water, condominium maintenance fee (where applicable); and, if the property is mortgaged, interest and principal payments on all mortgages, plus any other items included in the mortgage payment. An edit unduplicated the taxes and insurance if reported by both the owner and the lender. Selected owner costs are shown on a monthly basis and annually as a percent of income.

Real Estate Taxes—This is the amount of total real estate taxes paid on the property in the 12-month period preceding the survey. It includes both State and local real estate taxes. The respondent was requested not to include payments for special assessments or for taxes in arrears from prior years.

Real estate taxes are shown on an annual, per housing unit basis. Taxes are also presented on a per \$1,000 of value basis and as a percent of rental receipts or as a percent of household income. The "Not computed" category includes properties for which no taxes were paid.

Interest and Principal Payments as Percent of Income (Homeowner and condominium properties)—This percentage relationship is shown for first mortgage payments and total mortgage payments. The data are restricted to those cases where regular payments of interest and/or principal are made on the first mortgage.

Interest and Principal Payments as Percent of Rental Receipts (Rental and vacant properties)—This percentage was computed for first mortgages and for all mortgages on the property.

Selected Owner's Expenses as Percent of Rental Receipts (Rental and vacant properties)—Owner's expenses include real estate taxes, special assessments (if any),

property insurance, utilities, fuel, water, ground rent (if any); and, if the property is mortgaged, the amount for interest and principal on all mortgages, plus any other items included in the mortgage payment. An edit unduplicated the amounts for taxes and insurance if reported by both the owner and the lender. This item is shown only as a percent of rental receipts.

PROPERTY CHARACTERISTICS

Location by Size of Place—Data on the location of the property are shown by whether inside or outside SMSA and by population size of places within these areas. For a detailed explanation of these areas, see Appendix A, "Area Classifications."

Number of Housing Units—The number of housing units on a property is the count of all units occupied or intended for occupancy as separate living quarters.

Number of Buildings—Only buildings used for residential purposes were included. Not counted were buildings without housing units.

Manner of Acquisition—This item indicates how the current owner acquired the property; i.e., whether by purchase or by means other than purchase, and if purchased how the purchase was financed. In this survey, "purchase" includes transactions where the structure was built for or by the owner.

The owner was asked to report the manner in which he/she financed the acquisition of the property. If the land was acquired prior to acquisition of the building, the method of financing the building was to be reported.

It should be noted that the mortgage arrangements at the time the property was acquired were not necessarily the same as the current mortgage status. For example, a mortgage made at the time of property acquisition by the current owner may not be the same mortgage that is currently on the property, due to refinancing, renewal, etc.

The methods of acquisition are described below:

Placed one new mortgage. This includes cases where the present owner

made one new mortgage when the building was purchased or constructed. Wrap-around mortgages made at the time the property was acquired are included in this category.

Placed two or more new mortgages. In some instances, particularly involving large rental properties, the owner placed two or more mortgages.

Assumed mortgage already on the property. This includes cases where the properties were already mortgaged when acquired by the present owner and the present owner took over the obligations of the existing mortgage or mortgages.

Assumed a mortgage already on the property and placed a new mortgage. This includes cases in which the present owner took over an existing first mortgage and made a new second mortgage. Also included are cases in which the owner assumed first and second mortgages and made a new third mortgage.

All cash, no borrowing. In these cases, the owner paid cash for the property using savings or proceeds from sale of assets, including sale of other real estate.

Borrowed other than with a mortgage. This includes those cases in which the owner acquired the building with borrowed funds (for all or part of the purchase price or cost of construction) and this loan was *not* secured by a mortgage, deed of trust, land contract, etc.

Inheritance or gift. This includes transfer of husband-wife ownership to the surviving spouse upon the death of one or the other.

Other. Includes methods of acquisition such as properties acquired through foreclosure, delinquent tax sale, corporate reorganization, or trade for another property.

Purchase price and ratios involving purchase price are not shown for properties acquired other than by purchase; i.e., in a manner in which there either was no money involved, or the

amount of money did not represent the full value at time of acquisition. They are also not shown if the respondent marked "Other" or if the manner of acquisition was not reported.

Source of Downpayment (Homeowner and condominium properties)—This item indicates the major source of cash used for downpayment, outright purchase, or construction of the property. Data are limited to those properties acquired after 1974. A description of the sources is as follows:

Sale of previous home includes only those cases in which the previous home was sold during the 12-month period preceding the acquisition of the present home and the proceeds were used toward the purchase of the present property.

Sale of other real property or other investment includes money from the sale of other real property or real estate other than the previous home or from the sale of other investments such as securities (common and preferred stock, municipal or corporate bonds), dissolved business ventures, etc.

Savings includes cases in which the present owner(s) purchased their property with money drawn from savings, such as bank deposits, share accounts as in the case of credit unions, or savings bonds.

Borrowing other than a mortgage on property includes those cases where the owner(s) borrowed the downpayment.

Gift includes those cases in which the owner(s) used money received as a gift, regardless of the source, and used it as the downpayment on the property. Inherited money was to be reported in the "Other" category if it was used immediately for the downpayment. Generally, inherited funds tend first to be invested or deposited in savings accounts.

Land on which structures was built includes those cases in which the owner's equity in the property is the land on which the structure was built.

The term "structure" refers to residential structures, usually the owner's own home.

Other includes those cases in which the respondent could not classify the source in any of the above categories.

No downpayment required includes those cases where the owner did not use personal funds to finance the purchase; for example, a first and second mortgage combined to cover the total purchase price.

Source of Downpayment (Rental and vacant properties with 50 or more housing units acquired after 1974)—Although similar to the downpayment question asked respondents of homeowner and condominium properties, the instructions to the respondent for rental properties were to "Mark boxes which accounted for one-third or more" of the downpayment. Up to three sources of downpayment for any one property were tabulated. Therefore, the total number of sources is greater than the number of properties. Mortgage lenders as a rule do not lend money to large rental property owners who have not made some investment (equity) in the property, but the investment need not be in cash. The following items are categorized into cash and noncash sources:

Cash

Sale of stock for this project pertains to stocks sold as shares of ownership for the project; i.e., a corporation established solely for the purpose of constructing and/or operating the project.

Sale of previously owned stocks, shares, or other securities include common and preferred stock and municipal or corporate bonds.

Sale of land or other real estate includes real property or real estate sold to obtain the downpayment funds for purchase of this property.

Owner's cash, bank deposits, share accounts, or bonds include money drawn from the owner's personal savings.

Borrowing other than mortgage on this property includes those cases where the owner borrowed the downpayment and the loan was not secured by a mortgage.

Other cash source includes those cases for which the cash source was other than those specified above.

Noncash

Land used for structure(s) on this property are those cases in which the land on which the structure was built was the owner's equity in the property.

Fees (builder's, contractor's, architect's, lawyer's, engineer's) include cases in which such fees are waived in favor of partial ownership in the property.

Other noncash source includes those cases in which the respondent did not indicate the noncash source and properties for which no downpayment or owner equity was required.

Land and Building Acquisition—The owner was asked if he/she:

1. Acquired the entire property (land and building(s)) at same time or within the same 12-month period.
2. Constructed a building on land previously owned.
3. Acquired a building located on land he/she did not own.

Year Property Acquired—This item refers to the calendar year the building and land were acquired by the current owner or to the year the building was constructed by (or for) the owner on land previously acquired. "Acquired" includes purchase or other forms of acquisition, such as inheritance, gift, trade, and foreclosure. In those properties with more than one building acquired in different years, the year refers to the first building bought, built, or otherwise acquired.

A number of items and tables are shown only for properties acquired during a specified time period.

Year Structure Built—"Year structure built" refers to the calendar year in which the building was completed. It refers to original construction and not to any later remodeling, additions, reconstructions, or conversions. For properties with more than one building, the owner was instructed to answer for the first one completed.

Rooms—The intent of this question was to count the number of whole rooms used for living purposes. Included are living rooms, dining rooms, kitchens, bedrooms, finished attic or basement rooms, recreational rooms, permanently enclosed porches which are suitable for year-round use, and lodger's rooms. Excluded are bathrooms, halls, foyers, vestibules, balconies, closets, alcoves, pantries, and strip or pullman kitchens.

Purchase Price—Purchase price includes the total cost to the buyer of land and buildings on the property when acquired. The amount reported by the respondent was the total purchase price, including the downpayment, but excluding closing costs (saleman's commission, notary fees, title search, transfer taxes, etc.).

If the structure was built by (or for) the owner, he/she was asked to report total land and construction costs. The cost of land was not included if the owner of the building did not also own the land. Costs of improvements, conversions, and repairs made after the purchase or construction of the original structure were not to be included in the purchase price.

Purchase price is shown only when the current owner acquired the property by purchase or construction during the period 1977 through 1981.

Value—This is the amount the owner estimated the property would sell for on the current 1981 market, under ordinary conditions and not at a forced sale. Value in the condominium tables refer to the value of the individual unit only. Owners who had difficulty estimating the value of their property were asked to specify the range into which they thought the value fell.

If the owner of the property did not own the land on which the building stood, the land value was to be excluded from market value. This differs from the

1980 census where respondents were instructed to provide an estimate of the combined value of the building and land, even if only the building was owned. In cases where the property included more than one building, the value of the entire property was reported.

Rental Receipts (Rental and vacant properties)—The owner was asked to report total actual receipts from rent during the past year. Receipts from business or office units, as well as residential units, were included. Not included are receipts for extra services such as fees for parking, telephone use, or maid service.

For all items involving rental receipts data, the data are restricted to properties with at least 50 percent of the housing units in the rental market (either rented or available for rent) during the year preceding the survey. Cooperatively owned properties are also excluded from the tabulations.

Rental receipts are shown on a monthly, per housing unit basis. All housing units on the property were used to compute the per-housing-unit figure. Commercial rental receipts were not included in this tabulation.

Rental receipts are used in the ratios "Real estate tax as a percent of rental receipts" and "Interest and principal payments as a percent of rental receipts." Annual rental receipts are shown as a percent of value. In the ratios involving rental receipts, properties with no receipts are in the "Not computed" category.

Purchase Price as Percent of Value—This percentage was computed only for properties acquired by purchase or construction. Data are shown by period of purchase.

Purchase Price-Income Ratio (Homeowner and condominium properties)—This item relates the purchase price of the property to the owner's household income for calendar year 1980. The data are limited to properties purchased during the years 1977 through 1980 and the first half of 1981.

Rental Vacancy Losses as Percent of Potential Receipts (Rental and vacant properties)—The rental property owner was asked to estimate the vacancy loss (that is, the difference between actual receipts

and total potential receipts at 100 percent occupancy) for the past year. Data are restricted to properties in which at least 50 percent of the units were rented or available for rent during the entire year preceding the survey. Cooperatively owned properties are also excluded from the tabulations.

OWNER CHARACTERISTICS

Ownership Status (Homeowner and condominium properties)—This item refers to the number of persons owning the property. Properties owned jointly by husband and wife are classified as having two owners.

Age of Owner (Homeowner and condominium properties)—The respondent was asked to designate the age category shown on the questionnaire which applied to the owner's age. For properties having more than one owner, the data on age were tabulated for the owner listed first on the questionnaire.

Race of Owner (Homeowner and condominium properties)—The occupants of housing units were classified according to the race of the owner of the property into four groups, White; Black; Asian or Pacific Islander; and American Indian, Aleut, or Eskimo. The concept of race as used by the Census Bureau reflects self-identification by respondents; it does not denote clear-cut scientific definitions of biological stock. The data represent essentially self-classification by people according to the race with which they identify themselves. For properties having more than one owner, the data on race were tabulated for the owner listed first on the questionnaire.

Sex of Owner (Homeowner and condominium properties)—This item refers to the sex of the owner listed first on the questionnaire.

Spanish Origin (Homeowner and condominium properties)—Spanish origin as shown in this report refers to the owner of the property listed first on the questionnaire and not to any other household members. The data reflect owners who considered their origin or descent as being Spanish/Hispanic.

Veteran Status (Homeowner and condominium properties)—The respondent was asked to report if any of the owners of the property ever served in the Armed Forces of the United States, and, if so, to indicate the period of service, as shown on the questionnaire.

Service in the U.S. Armed Forces is defined as any active duty for any length of time at home or abroad in the U.S. Army, Navy, Marine Corps, Coast Guard, Air Force, or any reserve branch of these organizations. It excludes employment in the merchant marine or civilian employment in any branch of the Armed Forces, service in the National Guard Unit (except when called to active duty as during World War II and Korean Conflict), short periods of reserve training, or service in the armed forces of a foreign country.

Veterans reporting more than one period of service are classified according to the most recent period.

Type of Owner (Rental and vacant properties)—This item refers to the owner of rental and vacant property. Owners were classified as follows:

Individual includes joint ownership by two or more individuals, including husband and wife and estates of deceased owners. Also included were cases where ownership is held by a group of individuals who have not signed or formed a partnership arrangement.

Partnership refers to legally constituted partnerships only.

Real estate corporations are organized chiefly for the purpose of building, buying, selling, investing in, or managing property.

Real estate investment trust is an organization wherein funds from individuals are pooled for the purpose of buying real estate as an investment.

Financial institution includes banks, insurance companies, and savings and loan associations.

Housing cooperative organizations are usually incorporated and own properties for the benefit of their members who purchase shares in the corporation. The cooperative organization is

the owner of the property. A member of the cooperative has the right to occupy a specific housing unit and pays a proportionate share of the mortgage payment (if any), taxes, insurance, and operating costs.

Church or church-related refers to properties owned by a church-related institution.

Other includes educational institutions, philanthropic organizations, fraternal orders, etc. Also included in this category are properties temporarily owned by the Federal Housing Administration pending sale to new owners.

Persons in Household (Homeowner and condominium properties)—All persons

living in the household were counted in determining the number of persons who occupied the housing unit. These persons include not only occupants related to the owners but also any lodgers, foster children, wards, and resident employees who shared the living quarters of the owners.

Excluded were persons away in the Armed Forces, attending college, or in an institution such as a home for the aged or a mental hospital.

Income (Homeowner and condominium properties)—This is the sum of money received from wages or salary, self-employment, and other sources by all members of the household 15 years or older. The respondent was asked to report an annual figure for the calendar

year 1980. Instructions regarding what was to be included in the income figures are on the Forms D-1609 Condominium and D-1610 Homeowner questionnaires, facsimiles of which are shown on pages E-1 and E-7.

In the ratios involving income, properties whose owners reported no household income (or a loss) are included in the "Not computed" category.

Income data in the 1980 Census of Population were reported for calendar year 1979 by source of income for each member of the household. In the Residential Finance Survey, the questions were considerably less detailed. The respondent was asked to report only total aggregate income from all sources for the household.

DATA COLLECTION PROCEDURES

Survey Design and Techniques—The 1981 Residential Finance Survey was designed to provide data about the financing of nonfarm, privately owned residential properties.

The program was conducted by mailing questionnaires to a sample of property owners and to the lenders who held mortgages on the sample properties.

A sample of about 62,000 housing units was drawn from the addresses of housing units in the 1980 Census of Population and Housing. These addresses were limited to the counties and independent cities in the 376 sampling areas used for current surveys of the Census Bureau. For more detail, see Appendix D, "Accuracy of the Data."

Forms—Five questionnaires (reproduced in Appendix E) were used to collect data for the 1981 Residential Finance Survey. The homeowner questionnaire (D-1610) was mailed to all units in sample properties with one to four housing units; it provided for the reporting of characteristics of the property and the property owner(s). It also requested the name and address of the owner if he/she did not live on the property. If the property was mortgaged, the respondent was asked to report the person or firm to whom mortgage payments were made. A state-

ment on the form told the respondent that by providing the lender's name and address he/she was granting permission to the Census Bureau to contact that lender. The respondent had the option of not providing this information.

The "owner-seeker" letter (D-1613(L)) was mailed to apartments on properties with five or more housing units in order to determine the name and address of the owner or agent to whom rental payments were made or whether the unit was a condominium. The rental property or condominium questionnaire was then mailed to these owners or their agents. To minimize the reporting burden on the public and survey costs, the mailing of "owner-seeker" letters was limited to a maximum of seven apartments in any one multiunit structure.

The rental property questionnaire (D-1611) was mailed to owners or agents of properties with five or more housing units or those with less than five units when none was owner-occupied as indicated by responses on the D-1610 and D-1613 questionnaires. As with the D-1610 questionnaire, if the property was mortgaged, the respondents was asked to whom mortgage payments were made.

The condominium questionnaire (D-1609) was mailed to respondents in owner-occupied condominiums. Most condominiums were identified prior to the mailing of questionnaires through "owner-seeker" letters (D-1613 (L)). However, some condominiums which were not identified may have received homeowner questionnaires (D-1610). In these cases the information received was transcribed to a D-1609 questionnaire. As with the D-1610, the questionnaire provided for the reporting of characteristics of the property and owner(s), and if the property was mortgaged, the respondent was asked to report to whom mortgage payments were made.

The mortgagee (lender) questionnaire

(D-1612) was mailed to persons or firms to whom mortgage payments were made, as indicated on the homeowner, rental property and condominium questionnaires. It provided for the reporting of information about the mortgage. The form was designed to collect data on both first and junior mortgages.

Timing—The homeowner questionnaires and the "owner-seeker" letters were mailed on April 6, 1981. The rental property and condominium questionnaires were mailed on a flow basis beginning at the end of May 1981. The mortgagee questionnaires were mailed in two cycles, the first in August and the second in October 1981.

Enumeration—The 1981 Residential Finance Survey was essentially a centralized mail-out/mail-back operation conducted by the Data Preparation Division in Jeffersonville, Indiana. The mail enumeration of property owners occurred mainly in the months of April, May, and June 1981, and that of lenders in the fourth quarter of that year.

Field interviewing was limited to cases in which the owner was either not identified or failed to respond to the original mailed questionnaire and followup letters. Followup enumeration was conducted by interviewers from the 12 census regional offices.

Interviewers were trained for followup enumeration of property owners through an extensive home study course and a 1-day classroom training session conducted by supervisory personnel at each of the 12 regional offices.

Followup interviewing of lenders dealt mainly with individuals who held mortgages. Interviewers assigned to this task were trained in a home study course. Lending institutions received letters or phone calls from regional office personnel urging them to complete and return their questionnaires.

DATA PROCESSING PROCEDURES

Clerical Editing and Coding—The questionnaires were received in the Jeffersonville, Indiana, Data Preparation Division. Each questionnaire was screened for completeness, mortgage status, tenure, consistency between expected and actual number of housing units, and determination of whether the property was within the scope of the survey.

After screening, a clerical edit operation was performed to ensure that the proper questionnaire (homeowner, condominium or rental) was completed by the respondent, that the answers referred to the sample address, and that all sampled addresses were associated with the correct property. Questionnaires which failed the clerical edit were referred to professional staff at headquarters—Washington—for resolution. Upon completion of the clerical edit, questionnaires for nonmortgaged properties were prepared for data entry. Mortgaged property questionnaires were matched to the corresponding lender questionnaires and were shipped to headquarters for the mortgage edit. In general, the mortgage edit was performed to ensure that the owner and lender were reporting for the same mortgage and that all relating lender questionnaires were accounted for.

Specifically, mortgage edit comprised the following activities:

1. The reduction of the category of "No reports." In this volume no attempt was made to eliminate the "Not reported" category unless it could be done on the basis of other information about the property. For example, if the owner failed to report the year the

property was acquired, but did report that the mortgage was made at the time of acquisition, and the lender reported the year the mortgage was made, this was assumed also to be the year of acquisition.

It was possible to eliminate the "Not reported" category for most mortgage items for two reasons. First, there were two sources of information (the owner and the lender). Second, if a few facts are known about a mortgage, it is frequently possible to use a mortgage payment calculator and a loan progress chart to compute the missing information.

2. The interpretation of respondents' notes, which were numerous and frequently complex. To cite a few examples:

—Asked the interest rate, the respondent replied "2 points above prime rate at time."

—Asked the type of mortgage (1st, 2nd, etc.), the lender marked the "Other" box and explained "wrap mortgage covering two other mortgages."

—The owner reported three mortgages, with three different holders. One, but only one, holder explains in detail that it is in fact only one mortgage, with three persons entitled to the income.

3. Proration. This occurred when an owner reported his/her project as a single property, but the lender's response indicated more than one property was involved. (By definition, a property is what is covered by a single first mortgage.) It was necessary to prorate the owner's data on various property items (e.g., number of units, value,

expenses). Proration was usually done on the basis of the face amounts of the mortgages and/or the number of housing units on the property.

4. Consistency checks. The editors had a number of such checks to make; e.g.:
 - A junior mortgage cannot be placed before a first mortgage.
 - Outstanding debt cannot exceed face amount (except under some circumstances).
 - FHA-insured mortgages cannot be demand mortgages.

Computer Processing—Two distinct computer edits were performed on the survey data. The first edit made a recheck of selected "key" items to ensure that they were answered. It also made consistency checks for each data record keyed, (e.g., if the property had two mortgages, there must be two mortgage documents keyed for that property). This edit also checked for duplicate records for the same property. All cases which "failed edit" were reviewed and corrected by professional staff.

The second computer edit made a final check for internal consistency between items within a data record. For a few items, response allocations were made based on this check. In addition, this edit performed a "clean-up" function prior to data tabulation (e.g., blanking items which should not have been answered based on the questionnaire "skip" pattern).

The weighting of the data (including nonresponse adjustment and ratio estimation) along with the calculation of standard errors, medians, means, and all ratios, and the final tabulation of the data were performed by the computer.

INTRODUCTION

The data presented in this publication are based on the sample of properties selected for the 1981 Residential Finance Survey. These data are estimates of the values that would have been obtained if each property in the country had been interviewed. Estimates are expected to vary from the results of a complete count because they are subject to two basic types of error—sampling and nonsampling. The sampling error in the data arises because only a sample of properties was selected to be interviewed in this survey. The nonsampling error is the result of all other errors that may occur during the collection and processing phases of the survey. A more detailed discussion of sampling and nonsampling error and a description of the estimation procedure are supplied later in this appendix.

SAMPLE DESIGN

The sample for the 1981 Residential Finance Survey was selected in two

stages. In the first stage, primary sampling units (PSU's) were grouped into 376 strata and one PSU was selected from each stratum. A PSU consisted of a county, group of counties, or a standard metropolitan statistical area (SMSA). There were 156 strata (representing about 61 percent of the total 1980 population) with only one PSU. These PSU's were called self-representing (SR). Each of the remaining 220 strata was composed of more than one PSU. From each such stratum, one PSU was chosen with probability proportionate to its 1970 population. These PSU's were termed nonself-representing (NSR). The 376 sample PSU's contained counties and independent cities from each of the 50 States and the District of Columbia.

Within each sample PSU, a sample of residential properties was selected from a file of addresses enumerated in the 1980 census. To control the effect of large properties on the reliability of the sample estimates, addresses with 50 or more units located in portions of the sample PSU where the 1980 census was conducted by mail were identified in a search operation. The remaining parts of the sample PSU were not searched since they contained relatively few addresses with 50 or more units. Each address identified as being in an NSR PSU and containing at least 50 units, or in an SR PSU and containing at least 100 units, was included in the sample. Units at addresses in an SR PSU that contained 50 to 99 units were sampled at the rate of 1 in 180, and each address which contained a selected unit was in the sample. Units at addresses with 5 to 49 units (or at addresses with 50 or more units in areas where no search was conducted) in all PSU's were sampled at the overall rate of 1 in 1,400, and each such address that contained a selected unit was in the sample. Units at addresses with 1 to 4 units in all PSU's were sampled at the overall rate of 1 in 2,800, and each such address that contained a selected unit was in the sample.

A questionnaire was mailed to each sample address to determine the specific

property associated with the address. A "mortgaged property" was defined to be all of the buildings and land covered by a single first mortgage (a "first mortgage" has prior claim over any other mortgage, or is the only mortgage on the property). If the property was not mortgaged, the owner's definition of the property was used. The owner's name, characteristics of the property, and, for mortgaged properties, the name and address of the firm or person to whom mortgage payments were made were to be reported on the questionnaire. The property was classified as "homeowner" if it contained 1 to 4 units and at least one unit was occupied by the owner. Homeowner condominium properties were identified separately if they were owner occupied. All remaining properties were classified as "rental and vacant."

The sample of approximately 62,000 housing units produced about 55,900 sample properties. Of these properties, data were collected for 15,700 homeowner and 1,300 homeowner condominium properties as well as 3,900 rental and vacant properties with 1 to 4 units, 4,500 rental and vacant properties with 5 to 49 units, and 12,100 rental and vacant properties with 50 or more units. The remaining 18,400 properties included 11,200 that were not within the scope of this survey and 7,200 for which no data were obtained.

ERRORS IN THE DATA

Since the data in this report are based on a sample, they may differ somewhat from the values that would have been obtained if each property in the United States had been enumerated using the same questionnaire, instructions, enumerator, etc. The deviation of a sample estimate from the average of all possible samples is called the sampling error. The standard error of a survey estimate is a measure of the variation among the estimates from all possible samples and thus is a measure

of the precision with which an estimate from a particular sample approximates the average result of all possible samples. The sample estimate and its estimated standard error may be used to construct interval estimates that, with prescribed confidence, contain the average result of all possible samples. The method of calculating standard errors and confidence intervals for the data in this report is given below.

In addition to the variability that arises from the sampling procedures, sample estimates are subject to nonsampling error. Nonsampling error may be introduced during any or all operations used to collect and process survey data. For example, operations such as editing, reviewing, and handling questionnaires may introduce error into the data. A more detailed discussion of the sources of nonsampling error is given in the section on "Control of Nonsampling Error" in this appendix.

Nonsampling error may affect the data in two ways. Errors that are randomly introduced will increase the variability of the data and should therefore be reflected in the standard error. Errors that tend to be consistent in one direction will make sample estimates biased in that direction. For example, if respondents consistently tend to underreport their income, then the resulting counts of properties by income category will be skewed toward the lower income categories. Such biases are not reflected in the standard error.

CALCULATION OF STANDARD ERRORS

Totals and Percentages—The numbers in standard error tables A through L are approximations of standard errors for estimates of the total number and percent of homeowner, condominium, and rental properties.

Examples of and guidelines for the use of the tables are given in the section "Use of Tables To Compute Standard Errors" in this appendix.

Estimated Amount of Outstanding Mortgage Debt—Standard error table M shows approximate standard errors of estimated mortgage debt for homeowner properties and for 1 to 4, 5 to 49, and 50 or more unit rental and vacant properties.

Differences and Sums—The standard errors given in the tables are not directly applicable to differences between or sums of two sample estimates. The standard error of a difference between (or sum of) two sample estimates x and y is approximately the square root of the sum of the squares of the standard errors of the two individual sample estimates, i.e.,

$$Se_{(x+y)} \doteq Se_{(x-y)} \doteq \sqrt{(Se_x)^2 + (Se_y)^2}$$

This formula will represent the actual standard error quite accurately for the difference between (or sum of) characteristics in two different areas or for the difference between (or sum of) characteristics in the same area that are uncorrelated and separate (i.e., one is not a subset of the other). However, this formula will underestimate the standard error if the two items in a difference have a high negative correlation or if the two items in a sum have a high positive correlation. Similarly, the formula will overestimate the standard error if the two items in a difference have a high positive correlation or if the two items in a sum have a high negative correlation.

Medians—The standard error of a median of a characteristic depends on the distribution from which the median is derived and the number of properties in the distribution. The reliability of an estimated median can be approximated by determining an interval about the estimated median that contains the true median with a stated degree of confidence.

The first step in the process of estimating the upper and lower limits of the interval about the median is to compute one-half of the number of properties on which the median is based. Call this value $N/2$. Following the method described earlier for calculating the standard error of an estimated total number, use the appropriate table to compute the standard error of $N/2$, then subtract this standard error from $N/2$. The result is the lower limit of the confidence interval about $N/2$. Starting with the smallest value of the estimated total number for the characteristic, cumulate the frequencies in the appropriate column of the table on which the median is based until the sum equals or first exceeds the lower limit of the confidence interval about $N/2$. By using linear interpolation, a

value of the characteristic corresponding to this sum can be calculated. This value is the lower limit of the confidence interval for the estimated median.

In a similar manner, add the standard error of $N/2$ to $N/2$ to obtain the upper limit of the confidence interval about $N/2$, then, starting with the smallest value of the estimated total number for the characteristic, cumulate the frequencies in the column of the table described above until the sum equals or first exceeds the upper limit of the confidence interval about $N/2$. Interpolate as before to calculate the upper limit of the confidence interval for the estimated median.

An illustration of the use of the tables to determine confidence intervals for medians is given in a later section of this appendix.

CONFIDENCE INTERVALS

A sample estimate and its estimated standard error may be used to construct confidence intervals about the estimate. These intervals will contain the average value of the estimated characteristic that results over all possible samples, with a known probability. For example, if all possible samples that could result under the sample design of the survey were independently selected and surveyed under the same conditions, and if the estimate and its estimated standard error were calculated for each of these samples, then:

- (1) Approximately 68 percent of the intervals from one estimated standard error below the estimate to one estimated standard error above the estimate would contain the average result from all possible samples; and
- (2) Approximately 95 percent of the intervals from two estimated standard errors below the estimate to two estimated standard errors above the estimate would contain the average result from all possible samples.

The intervals are referred to as 68-percent and 95-percent confidence intervals, respectively.

The average value of the estimated characteristic that could be derived from all possible samples may or may not be contained in any particular computed

interval. Thus one cannot make the statement that the average value has a certain probability of falling between the limits of the calculated confidence interval. Rather, one can say with a specified probability or confidence that the calculated confidence interval includes the average estimate from all possible samples (which is approximately the complete count value).

Confidence intervals may also be constructed for the difference between or sum of two sample figures. This is done by computing the difference between (sum of) these figures, obtaining the standard error of the difference (sum) using the formula given earlier, and then forming a confidence interval for this estimated difference (sum) as described above. One can then say with specified confidence that this interval includes the difference (sum) that would have been obtained by averaging the results from all possible samples.

The estimated standard errors given in this report do not include all portions of the variability due to nonsampling error that may be present in the data. The standard errors reflect the effect of simple response variance, but not the effect of correlated errors introduced by enumerators, coders, or other field or processing personnel. Thus, the standard errors calculated represent a lower bound of the total error. As a result, confidence intervals formed using these estimated standard errors may not meet the stated levels of confidence (i.e., 68 or 95 percent). Thus, some care must be exercised in the interpretation of the data in this publication based on the estimated standard errors.

For more information on confidence intervals and nonsampling error see any standard sampling theory text.

USE OF TABLES TO COMPUTE STANDARD ERRORS

Examples—Table 2a in chapter 8 shows that 93,788 rental and vacant properties with 5 to 49 units in the United States have a first mortgage loan of \$10,000 to \$49,999. Linear interpolation can be used to calculate standard errors for estimated totals that are between two of the row values shown in the tables (this also applies to standard errors for estimated percents, provided that the estimated

percent is between 2 and 98 and the base of the percent is between two of the row values in the table). By using linear interpolation in the second column of standard error table I, an approximate standard error for this estimate of 93,788 rental and vacant properties with 5 to 49 units in the United States is

$$5,000 + \frac{93,788 - 75,000}{100,000 - 75,000} (6,000 - 5,000) = 5,750$$

Thus, a 95-percent confidence interval for this estimated total is [93,788 - 2(5,750)] to [93,788 + 2(5,750)] or 82,288 to 105,288.

One can say with about 95 percent confidence that this interval includes the value that would have been obtained by averaging the results from all possible samples.

Table 1 in chapter 4 shows that 18.1 percent of the non-condominium homeowner properties with a Black owner were built between 1960 and 1969. The standard error of this percent is obtained from standard error table D. Since this percent is based on 2,848,000 properties, the standard error of this percent using linear interpolation on both the percent and base of the percent is approximately 1.3 percent.

A note of caution concerning numerical values is necessary. Standard errors of percentages derived in this manner are approximate. Calculations can be expressed to several decimal places, but to do so would indicate more precision in the data than is justifiable. Final results should contain no more than one decimal place when the estimated standard error is one percentage point (i.e., 1.0) or more.

The calculation of a confidence interval for the estimated median of the first mortgage loan for one-unit non-condominium homeowner properties in the United States will now be illustrated. Table 2a in chapter 2 shows that the estimated number of one-unit non-condominium homeowner properties in the United States with a first mortgage loan is 25,116,000, so the value of N/2 in this example is 12,558,000. The standard error of N/2 is 194,000 which is obtained by using linear interpolation in the second column of standard error table A. A 95-percent confidence interval about N/2 is [12,558,000 - 2(194,000)]

to [12,558,000 + 2(194,000)] or 12,170,000 to 12,946,000. By cumulating the frequencies in the second column of table 2a in chapter 2 until the sum equals or first exceeds the limits given above for the 95-percent confidence interval about N/2 and then using linear interpolation, a 95-percent confidence interval for the estimated median of the first mortgage loan for one-unit non-condominium homeowner properties is: [\$20,000 + 5,000(2,575/3,017)] to [\$25,000 + \$5,000(334/2,721)] or \$24,300 to \$25,600.

Guidelines for Use of Tables—The entry in a particular row (estimated number of properties) and column (geographic level) of a standard error table for estimated number of properties was calculated using the equation

$$SE(x) = \sqrt{x(ax + b)},$$

where x = the number of properties, and a and b are the last two entries in the column for the given geographic level. For example, the approximate standard error for a non-condominium homeowner estimate of 25,000 properties in the Northeast is

$$\sqrt{25,000[(-.000406898)(25,000) + 3840.17]}$$

or 10,000 rounded to the nearest thousand, which corresponds to the entry in the second row of the fifth column of table A. The equation above was also used to produce the entry in a specified row (estimated mortgage debt) and column (type of property) of the standard error table for estimated mortgage debt (Table M), in which case x = the estimated mortgage debt.

The entry in a given row (number of properties used as base of estimated percent) and column (estimated percent) of a standard error table for estimated percent was calculated using the equation

$$SE(p) = \sqrt{\frac{b}{y} p(100-p)},$$

where b is the value in the last row of the table, y = the number of properties used as the base of the estimated percent, and p = the estimated percent. For example, the approximate standard error for a 10 percent condominium homeowner estimate based on a universe of 500,000 properties is

$$\sqrt{\frac{1,900.4}{500,000} (10)(100-10)}$$

or about 1.8 percent, which corresponds to the entry in the ninth row of the fourth column of Table F.

Note that the first (last) equation given above can be used in place of linear interpolation to calculate approximate standard errors for an estimated total (percent) as long as the estimated total is between two row values in the appropriate table (estimated percent is between 2 and 98 and the base of the percent is between two row values in the appropriate table).

As is evident from the above two equations, the calculated standard errors of zero estimates or of very small estimated totals or percents approach zero. This is also the case for very large percents. These estimated totals and percents are, nevertheless, still subject to sampling and nonsampling variability, so a zero or very small estimated standard error is not appropriate. For an estimated total that is less than the smallest value given in the table, use the standard error for the smallest value in the appropriate column. For an estimated percent that is smaller than 2 or larger than 98 based on a universe size of a specific value, use the standard error given in the row for that universe size and the 2 or 98 percent column.

ESTIMATION PROCEDURE

Adjustment for Nonresponse—To account for nonresponse in properties with similar characteristics, a noninterview factor was applied to each interviewed property. After each property was inflated by the reciprocal of its probability of selection (call this the property's basic weight), the property was tabulated into one of 56 groups defined by region (Northeast, North Central, South, West) and various property characteristics (number of units, located in an SR or NSR PSU, etc.). Then, each interviewed property within a given group was multiplied by an appropriate noninterview factor. The numerator of this factor was the sum of the basic weights of all properties (interviewed and noninterviewed) in the group. The denominator was the sum of the basic weights of the interviewed properties in the group.

If necessary, the groups were combined, or collapsed, within region to control the size of the noninterview factor. Each group that did not satisfy certain collapsing criteria involving the number of properties or the noninterview factor was collapsed, according to a specified pattern, with one or more groups until all collapsing criteria were met.

Ratio Estimation—Estimates for this survey were obtained from a ratio estimation procedure. In general, this procedure produced results that were more reliable than those that would have been obtained if the data for each sample property were inflated by the reciprocal of the property's probability of selection (i.e., if a simple inflation estimate procedure was used) and by a noninterview factor. Ratio estimation improves the reliability of estimates when there is a sufficiently high positive correlation between the estimated characteristic and a statistic which can be estimated from the survey and for which values are available from an independent source (such as the census).

For this survey, ratio estimation was applied separately to two property categories—homeowner (which includes all owner-occupied condominiums), and rental and vacant. After the survey data for a property were inflated by the reciprocal of the property's probability of selection and by a noninterview factor, the data were tabulated separately for each property category into 32 groups defined by region and the following eight geographic breakdowns:

SMSA with 1,000,000 or more persons
1 Inside central city
2 Outside central city

SMSA with 250,000 to 999,999 persons
3 Inside central city
4 Outside central city

SMSA with less than 250,000 persons
5 Inside central city
6 Outside central city

Not SMSA
7 Urban
8 Rural

As a final step in the estimation procedure, the values of the survey data in each group within each property category were

multiplied by an appropriate ratio factor. For a homeowner property group, the numerator of this ratio factor was the 1980 census count of owner occupied units in 1 to 4 unit structures classified into the group, and the denominator was the survey estimate of the number of owner-occupied units in homeowner properties classified into the group. For a rental and vacant property group, the numerator was the sum of the 1980 census counts of renter-occupied or vacant units and owner-occupied units in five or more unit structures classified into the group. The denominator was the survey estimate of the number of renter-occupied or vacant units in homeowner properties classified into the group plus the number of units in rental and vacant properties classified into the group.

If necessary, the geographic breakdowns were collapsed within property category and region to increase the reliability of the ratio estimation procedure. Any geographic breakdown that did not meet certain collapsing criteria involving the unweighted sample count or the ratio factor was combined, according to a specified pattern, with one or more geographic breakdowns until all collapsing criteria were met.

Derivation of An Estimate—Under the ratio estimation procedure, each sample property was given a weight that was equal to the product of the reciprocal of the probability of selection, noninterview factor, and ratio factor assigned to the sample property. For a given tabulation class, a characteristic total was estimated by summing the weights given to the sample properties that were in the tabulation class and possessed the characteristic.

CONTROL OF NONSAMPLING ERROR

As mentioned above, nonsampling error is present in sample data. If left unchecked, such error could introduce serious bias into the data and cause much more variation in the data than that which is attributable solely to sampling error.

The sources of nonsampling error, i.e., human and mechanical errors, are present in any large statistical undertaking. Errors during the data collection phase may include failing to collect

required information from respondents, obtaining incorrect or inconsistent data, and recording information incorrectly or in the wrong place. Errors can also occur during the field review of an enumerator's work, the clerical handling of questionnaires, the manual editing and coding operations, and the numerous stages of electronic processing of the material.

The data are limited by the breadth of the respondent's knowledge and willingness to supply accurate reports. The use of self-enumeration questionnaires

enables the property owners and mortgage lenders to read the questions as worded and consult their records to obtain correct answers. In addition, brief explanations provided for some items on the questionnaires assure that the respondents receive uniform instructions.

Certain mortgage related questions appear on both the owner's and lender's questionnaires and, thus, are subject to verification. These include number of mortgages on the property, type of mortgage (FHA, VA, etc.), amount of

mortgage payment, amount of mortgage loan, and date the mortgage was made or assumed. Care was taken at each step of the data collection phase to reduce the effect of processing and tabulation errors, and quality control measures were used throughout the operation. However, it is unlikely that these controls were able to eliminate the effect of all such errors that contribute to nonsampling error. For a more detailed discussion of the procedures used to reduce nonsampling error, see Appendix C, "Data Collection and Processing Procedures."

Table A. **Approximate Standard Error of Estimated Number of Non-Condominium Homeowner Properties or Non-Condominium Homeowner Properties With White Owner, for United States, Inside and Outside SMSA's, and Regions**

(68 chances out of 100)

Estimated Number of Properties	United States	Inside SMSA	Outside SMSA	Northeast and West	North Central and South

Form Approved: O.M.B. No. 41-580018 FORM D-1609 (6-8-80)										
NOTICE — Your answers are confidential by law (title 13, United States Code). This means that no one may see your answers except census workers who are sworn not to disclose your information and who can be fined and/or imprisoned for any violation. The law also requires that you answer the questions to the best of your knowledge.	U.S. DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS RESIDENTIAL FINANCE SURVEY CONDOMINIUM QUESTIONNAIRE 1980 Census of Housing									
Please correct any errors in the address including ZIP code.	<div style="display: flex; align-items: center;"> <div style="border: 1px solid black; padding: 2px; font-size: small; margin-right: 5px;"> Please complete this form and RETURN to </div> <div style="text-align: center;"> BUREAU OF THE CENSUS ATTN: Residential Finance 1201 East Tenth Street Jeffersonville, Indiana 47132 </div> </div>									
<p>FROM THE DIRECTOR BUREAU OF THE CENSUS</p> <p>As part of the 1980 Census of Housing, the Bureau of the Census is collecting information on how people finance their homes. The statistics prepared from the information provided by individuals and lending organizations will be very useful in developing both private and government programs concerned with residential financing.</p> <p>In order to collect the necessary information most effectively and with the least inconvenience, a small sample of properties has been selected to represent all similar properties in the United States. The property described on this questionnaire is one that was scientifically selected for this survey. It is extremely important that we receive a response for each property selected.</p> <p>If you are the owner of the described property, we would appreciate your cooperation in filling out this questionnaire as completely and accurately as you can. If you cannot provide exact figures for some questions, estimates will be satisfactory. A preaddressed envelope has been provided for you to return this questionnaire.</p> <p>If you are not the owner of the property, please answer questions 1 through 3, then return this form in the enclosed envelope.</p> <p>Response to this inquiry is required by law, title 13, United States Code. Under this law, your individual report is confidential and can be used only for the purpose of statistical summaries. No information on an individual property or person can be published or otherwise released to any other government agency (Federal, State, or local) or to any private organization.</p> <p>Please complete and return this questionnaire within 5 days.</p> <p>Thank you for your cooperation.</p> <p>Enclosure</p>										
1. Who is the owner of the property described above?	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td colspan="3" style="padding: 2px;">Name of owner</td> </tr> <tr> <td colspan="3" style="padding: 2px;">Address (Number and street)</td> </tr> <tr> <td style="padding: 2px;">City</td> <td style="padding: 2px;">State</td> <td style="padding: 2px;">ZIP code</td> </tr> </table>	Name of owner			Address (Number and street)			City	State	ZIP code
Name of owner										
Address (Number and street)										
City	State	ZIP code								
<p>Please read — This questionnaire is designed to be answered by the owner-occupant of a condominium house or apartment. If this is an owner-occupied condominium, please complete this questionnaire. If this is NOT a condominium or if it is a condominium not occupied by its owner, answer only questions 1 through 3 and return the questionnaire in the enclosed preaddressed envelope.</p>										
2. Is the property described above a condominium house or apartment?	<div style="display: flex; align-items: flex-start;"> <input type="checkbox"/> Yes, a condominium — <i>CONTINUE</i> with question 3 <div style="margin-left: 20px;"> <input type="checkbox"/> No, not a condominium — No further entries required. Please return this questionnaire in the enclosed preaddressed envelope. </div> </div>									
3. Does the owner live in this condominium?	<div style="display: flex; align-items: flex-start;"> <input type="checkbox"/> Yes — <i>CONTINUE</i> with Section 1 on page 2. <div style="margin-left: 20px;"> <input type="checkbox"/> No — No further entries required. Please return this questionnaire in the enclosed preaddressed envelope. </div> </div>									

Section 1 – PRESENT MORTGAGE			
<p>Please read – The following questions relate to the PRESENT mortgage on this condominium. The term "Mortgage" includes all forms of debt for which this property is given as security, such as mortgages, deeds of trust, trustee's deeds, and similar instruments including contracts to purchase.</p>

NOTICE — Your answers are confidential by law (title 13, United States Code). This means that no one may see your answers except census workers who are sworn not to disclose your information and who can be fined and/or imprisoned for any violation. The law also requires that you answer the questions to the best of your knowledge.

Please correct any errors in the address including ZIP code.

**FROM THE DIRECTOR
BUREAU OF THE CENSUS**

As part of the 1980 Census of Housing, the Bureau of the Census is collecting information on how people finance their homes. The statistics prepared from the information provided by individuals and lending organizations will be very useful in developing both private and government programs concerned with residential financing.

In order to collect the necessary information most effectively and with the least inconvenience, a small sample of properties has been selected to represent all similar properties in the United States. The property described on this questionnaire is one that was scientifically selected for this survey. It is extremely important that we receive a response for each property selected.

If you are the owner of the described property, we would appreciate your cooperation in filling out this questionnaire as completely and accurately as you can. If you cannot provide exact figures for some questions, estimates will be satisfactory. A preaddressed envelope has been provided for you to return this questionnaire.

If you are not the owner of the property, please answer questions 1 through 3, then return this form in the enclosed envelope.

Response to this inquiry is required by law, title 13, United States Code. Under this law, your individual report is confidential and can be used only for the purpose of statistical summaries. No information on an individual property or person can be published or otherwise released to any other government agency (Federal, State, or local) or to any private organization.

Please complete and return this questionnaire within 5 days.

Thank you for your cooperation.

Enclosure

1. Who is the owner of the property described above?

Name _____

Address (Number and street) _____

City _____ State _____ ZIP code _____

2. Is this property —

1 ☐ A mobile home or trailer?

BUREAU OF THE CENSUS

**RESIDENTIAL FINANCE SURVEY
RENTAL PROPERTY QUESTIONNAIRE**
1980 Census of Housing

Please complete this form and RETURN TO: BUREAU OF THE CENSUS
ATTN: Residential Finance
1201 East Tenth Street
Jeffersonville, Indiana 47132

In reply refer to → Control number

NOTICE — Your answers are confidential by law (title 13, United States Code). This means that no one may see your answers except census workers who are sworn not to disclose your information and who can be fined and/or imprisoned for any violation. The law also requires that you answer the questions to the best of your knowledge.

Please correct errors in name, address and ZIP code.

**FROM THE DIRECTOR
BUREAU OF THE CENSUS**

As part of the 1980 Census of Housing, the Bureau of the Census is collecting information on how people finance their homes. The statistics prepared from the information provided by individuals and lending organizations will be very useful in developing both private and government programs concerned with residential financing.

In order to collect the necessary information most effectively and with the least inconvenience, a small sample of properties has been selected to represent all similar properties in the United States. The property described on this questionnaire is one that was scientifically selected for this survey. It is extremely important that we receive a response for each property selected.

If you are the owner or manager of the described property, we would appreciate your cooperation in filling out this questionnaire as completely and accurately as possible. If you cannot provide exact figures for some questions, estimates will be satisfactory. A preaddressed envelope has been provided for you to return this questionnaire. Should you receive more than one questionnaire for the same property, please mark extra ones "Duplicate" and return them.

For the purpose of this survey of residential finance, a "property" is defined as the land and structures covered by a single first mortgage. Therefore, if there is more than one first mortgage involved in your entire holding, please report only for the mortgage covering the address of the sample property.

If you are not the owner or manager of the property, please answer questions 1 through 3, then return this form in the enclosed envelope.

Response to this inquiry is required by law, title 13, United States Code. Under this law, your individual report is confidential and can be used only for the purpose of statistical summaries. No information on an individual property, firm, or person can be published or otherwise released to any other government agency (Federal, State, or local) or to any private organization.

Please complete and return this questionnaire within 5 days.

Thank you for your cooperation.

Enclosure

This questionnaire refers to the following property →

1. Who is the owner of the property described above?

Name

Address (Number and street)

City State ZIP code

2. Is this property —
Mark (X) all applicable boxes

1 ☐ A mobile home or trailer park?

2 ☐ A building containing condominium units?

3 ☐ On a place of 10 or more acres which has less than 5 living quarters or apartments?

4 ☐ Owned by a Federal, State, or local public body?

5 ☐ A hotel or motel with 50 percent or more of the accommodations reserved for transient use?

6 ☐ One in which more than half of the floor space is used for non-residential purposes?

7 ☐ None of the above? — CONTINUE with question 3

If any box 1 through 6 is marked, no further entries are required. Please return this questionnaire in the envelope provided.

3. Does the owner live on this property?

☐ No

☐ Yes → ☐ Principal residence
☐ Second home

Section I — PRESENT MORTGAGE			
<p>Please read — The following questions relate to the PRESENT mortgage on this property. The term "Mortgage" includes all forms of debt for which this property or building is given as security, such as mortgages, deeds of trust, trustee's deeds, and similar instruments including contracts to purchase.</p>			
<p>4. Do you have a mortgage, deed of trust, contract to purchase, or similar debt on this property?</p>	<div style="display: flex; justify-content: space-between;"> <div style="width: 80%;"> <p><input type="checkbox"/> Yes — Mark all applicable boxes/</p> <p>1 <input type="checkbox"/> Mortgage, deed of trust, trustee's deed</p> <p>2 <input type="checkbox"/> Contract to purchase (including land contract, contract for deed, etc.)</p> <p>3 <input type="checkbox"/> Some other debt connected with the property/ Specify _____</p> <p>4 <input type="checkbox"/> No, property is not mortgaged — SKIP to question 16a</p> </div> <div style="width: 15%; text-align: center; border-left: 1px solid black; padding-left: 5px;"> <p>CONTINUE with question 5</p> </div> </div>		
<p>5. How many mortgages (including contract to purchase) are there on this property?</p>	<p>1 <input type="checkbox"/> One</p> <p>2 <input type="checkbox"/> Both a first and a second</p> <p>3 <input type="checkbox"/> More than two — How many? _____</p>		
<p>ANSWER QUESTIONS 6–10 FOR EACH MORTGAGE.</p> <p>6. Is the present mortgage —</p> <p>a. Insured by the Federal Housing Administration?</p> <p>b. Guaranteed or insured by the Veterans Administration?</p> <p>c. Insured by the Farmers Home Administration?</p> <p>d. None of the above?</p>	<p>First mortgage or contract to purchase</p> <p>1 <input type="checkbox"/></p> <p>2 <input type="checkbox"/></p> <p>3 <input type="checkbox"/></p> <p>4 <input type="checkbox"/></p>	<p>Second mortgage</p> <p>2 <input type="checkbox"/></p> <p>3 <input type="checkbox"/></p> <p>4 <input type="checkbox"/></p>	<p>Third mortgage or other debt</p>
<p>7. In what year was the present mortgage placed by you or assumed by you?</p>	<p>19 _____</p>	<p>19 _____</p>	<p>19 _____</p>
<p>8. What was the amount of the present mortgage when placed by you or assumed by you?</p>	<p>\$ _____</p>	<p>\$ _____</p>	<p>\$ _____</p>
<p>9. What are the regular required payments to the lender? Round to nearest dollar.</p>	<p>\$ _____ .00</p> <p>Per _____ (Month, year, etc.)</p>	<p>\$ _____ .00</p> <p>Per _____ (Month, year, etc.)</p>	<p>\$ _____ .00</p> <p>Per _____ (Month, year, etc.)</p>
<p>10. What does this regular payment include? Mark (X) all applicable boxes</p>	<p>1 <input type="checkbox"/> Principal</p> <p>2 <input type="checkbox"/> Interest</p> <p>3 <input type="checkbox"/> Real estate tax</p> <p>4 <input type="checkbox"/> Property insurance</p> <p>5 <input type="checkbox"/> Other — Specify _____</p>	<p>1 <input type="checkbox"/> Principal</p> <p>2 <input type="checkbox"/> Interest</p>	<p>1 <input type="checkbox"/> Principal</p> <p>2 <input type="checkbox"/> Interest</p>
<p>Please read — There are several questions concerning your mortgage that are more easily answered by the holder (or servicer) of your mortgage. The answers to these questions (11a, b, c) will enable us to contact the holder to obtain further information about prepayment provisions, the outstanding balance, whether the mortgage has been sold (mortgages are frequently sold between lenders without the knowledge of the borrower), and related items. All information you report to the Bureau, and any information the mortgage holder gives the Bureau, will be kept confidential as required by law, and will not be disclosed to any agency or person for any reason whatsoever.</p>			
<p>11. To whom do you make your mortgage payments?</p> <p>a. First mortgage or contract to purchase</p>	<p>Name _____</p> <p>Address (Number and street) _____</p> <p>City _____ State _____ ZIP code _____</p> <p>Mortgage account number _____</p>		
<p>b. Second mortgage</p>	<p>Name _____</p> <p>Address (Number and street) _____</p> <p>City _____ State _____ ZIP code _____</p> <p>Mortgage account number _____</p>		
<p>c. Third mortgage or any other loan on this property</p>	<p>Name _____</p> <p>Address (Number and street) _____</p> <p>City _____ State _____ ZIP code _____</p> <p>Mortgage account number _____</p>

FORM D-1613(L)
(5-80)

FORM APPROVED
O.M.B. NO. 41-580018

UNITED STATES DEPARTMENT OF COMMERCE
Bureau of the Census
Washington, D.C. 20233

OFFICE OF THE DIRECTOR

**FROM THE DIRECTOR
BUREAU OF THE CENSUS**

The Bureau of the Census is conducting a sample survey of residential finance in connection with the 1980 Decennial Census. We are collecting information on how people finance their homes. The statistics prepared from the information provided by individuals and lending organizations will be very useful in developing both private and government programs concerned with residential financing. In order to collect the necessary information, we need the name and address of the owner or rental agent of the apartment which you occupy.

Please enter the owner's name and address below (the person or company to whom you make your rent payments) and mail this entire sheet today in the enclosed preaddressed envelope.

Name

Address of owner or agent — Number and street

City

State

ZIP code

Is the person or company named above —

Mark (X) one

☐ Owner?

☐ Rental agent?

☐ Other — Specify _____

Is your apartment a condominium?

Mark (X) one

☐ Yes, a condominium occupied by the owner

☐ Yes, a condominium not occupied by the owner

☐ No, not a condominium

Response to this inquiry is required by law, title 13, United States Code. This law also provides that your report is confidential and can be seen only by sworn Bureau of the Census employees.

Thank you for your cooperation.

GENERAL

The results of the 1980 Census of Population and Housing are issued in three forms: printed reports, computer tape

files, and microfiche. Most of the reports listed are issued on a flow basis through 1983. A few may be issued later, such as Subject Reports and Evaluation and Reference Reports.

The publications of the 1980 census are released under three subject titles: *1980 Census of Population and Housing*, *1980 Census of Population, and 1980 Census of Housing*. The description of the publication program below is organized in sections, by census title, followed by the reports under each title. It should be noted that a number of population census reports contain some housing data and a number of housing census reports contain some population data. Following the description of the publication program are sections on computer tapes, maps, and microfiche.

The data product descriptions include listings of geographic areas for which data are summarized in that product. Note that the term "place" refers to incorporated places and census designated (or unincorporated) places, as well as towns and townships in 11 States (the 6 New England States, the 3 Middle Atlantic States, Michigan, and Wisconsin).

Order forms for these materials are available, subject to availability of the data product, from Data User Services Division, Customer Services, Bureau of the Census, Washington, D.C. 20233; Census Bureau Regional Offices; U.S. Department of Commerce District Offices; and State Data Centers. After issuance, census reports are on file in many libraries and are available for examination at any Department of Commerce District Office or Census Bureau Regional Office.

PUBLICATIONS

Population and Housing Census Reports

PHC80-1, Block Statistics—These reports, which are issued on microfiche rather

than in print form, present population and housing unit totals and statistics on selected characteristics which are based on complete-count tabulations. Data are shown for blocks in urbanized areas and selected adjacent areas, for blocks in places of 10,000 or more inhabitants, and for blocks in areas which contracted with the Census Bureau to provide block statistics.

The set of reports consists of 374 sets of microfiche and includes a report for each standard metropolitan statistical area (SMSA), showing blocked areas within the SMSA, and a report for each State and for Puerto Rico, showing blocked areas outside SMSA's. In addition to microfiche, printed detailed maps showing the blocks covered by the particular report are available as well as a U.S. Summary, which is an index to the set.

PHC80-2, Census Tracts—Statistics for most of the population and housing subjects included in the 1980 census are presented for census tracts in SMSA's and in other tracted areas. Both complete-count data and sample data are included. Most statistics are presented by race and Spanish origin for areas with at least a specified number of persons in the relevant population group.

There is one report for each SMSA, as well as one for each of the States and Puerto Rico which have tracted areas outside SMSA's. In addition, maps showing the boundaries and identification numbers of census tracts in the SMSA are available as well as a U.S. Summary, which is an index to the set and also provides a historical listing of the total number of tracts by area.

PHC80-3, Summary Characteristics for Governmental Units and Standard Metropolitan Statistical Areas—Statistics are presented on total population and on complete-count and sample population characteristics such as age, race, education, disability, ability to speak English, labor force, and income, and on total housing units and housing characteristics such as value, age of structure, and rent. These statistics are shown for the following areas or their equivalents: States, SMSA's, counties, county subdivisions (those which are functioning general-purpose local governments), and incorporated places.

There is one report for each State, the District of Columbia, and Puerto Rico.

This series does not include a U.S. Summary.

PHC80-4, Congressional Districts of the 98th Congress—These reports present complete-count and sample data for congressional districts of the 98th Congress. The reports reflect redistricting based on the 1982 elections. One report is issued for each of the 50 States and the District of Columbia.

PHC80-S1-1, Provisional Estimates of Social, Economic, and Housing Characteristics—This report presents provisional estimates based on sample data collected in the 1980 census. Data on social, economic, and housing characteristics are shown for the United States as a whole, each State, the District of Columbia, and SMSA's of 1 million or more inhabitants.

These data are based on a special subsample of the full census sample. The sample, which represents about 1.6 percent of the total population, was developed to provide users with initial data on characteristics of the population and housing units for the Nation and large areas.

PHC80-S2, Advance Estimates of Social, Economic, and Housing Characteristics—These reports present advance sample data from the 1980 census including such social and economic characteristics of the population as education, migration, labor force, and income as well as housing characteristics such as structural information, mortgage, and gross rent.

The set consists of 50 paperbound reports and includes one report for each State and the District of Columbia. No report will be issued for the United States as a whole.

Each report presents population and housing characteristics for the State, its counties or comparable areas, and places of 25,000 or more inhabitants. Selected data are shown for four race groups (White; Black; combined American Indian, Eskimo, and Aleut; and Asian and Pacific Islander) as well as for persons of Spanish origin.

Population Census Reports

PHC80-1, Volume 1, Characteristics of the Population—This volume presents final

population counts and statistics on population characteristics. It consists of reports for the following 57 areas: the United States, each of the 50 States, the District of Columbia, Puerto Rico, and the Outlying Areas—Guam, the Virgin Islands of the United States, American Samoa, and the Northern Mariana Islands and the remainder of the Trust Territory of the Pacific Islands. The volume consists of four chapters for each area, chapters A, B, C, and D. Chapters A and B present data collected on a complete-count basis, and chapters C and D present estimates based on sample information, except for the Outlying Areas where all data were collected on a complete-count basis.

The population totals presented in chapters A and B may differ from the counts presented earlier in the PHC80-V reports because corrections were made for errors found after the PHC80-V reports were issued. Chapters B, C, and D present statistics by race and Spanish origin for areas with at least a specified number of the relevant population group.

The U.S. Summary reports present statistics for the United States, regions, divisions, States, and selected areas below the State level. The State or equivalent Area reports (which include the District of Columbia, Puerto Rico, and the Outlying Areas) present statistics for the State or equivalent area and its subdivisions.

Statistics for each of the 57 areas are issued in separate paperbound reports of chapters A, B, C, and D.

PHC80-1-A, Chapter A, Number of Inhabitants—Final population counts are shown for the following areas or their equivalents: States, counties, county subdivisions, incorporated places and census designated places, standard consolidated statistical areas (SCSA's), SMSA's, and urbanized areas. Selected tables contain population counts by urban and rural residence. Many tables contain population counts from previous censuses.

PHC80-1-B, Chapter B, General Population Characteristics—Statistics on household relationship, age, race, Spanish origin, sex, and marital status are shown for the following areas or their equivalents: States, counties (by total and rural residence), county subdivisions, places of 1,000 or more inhabitants, SCSA's,

SMSA's, urbanized areas, American Indian reservations, and Alaska Native villages.

PC80-1-C, Chapter C, General Social and Economic Characteristics—Statistics are presented on nativity, State or country of birth, citizenship and year of immigration for the foreign-born population, language spoken at home and ability to speak English, ancestry, fertility, family composition, type of group quarters, marital history, residence in 1975, journey to work, school enrollment, years of school completed, disability, veteran status, labor force status, occupation, industry, class of worker, labor force status in 1979, income in 1979, and poverty status in 1979. In addition, data on subjects shown in the PC80-1-B reports are presented in this report in more detail.

Each subject is shown for some or all of the following areas or their equivalents: States, counties (by rural and rural-farm residence), places of 2,500 or more inhabitants, SCSA's, SMSA's, urbanized areas, American Indian reservations, and Alaska Native villages.

PC80-1-D, Chapter D, Detailed Population Characteristics—Statistics on most of the subjects covered in the PC80-1-C reports are presented in this report in considerably greater detail and cross-classified by age, race, Spanish origin, and other characteristics. Each subject is shown for the State or equivalent area, and some subjects are also shown for rural residence at the State level. Most subjects are shown for SMSA's of 250,000 or more inhabitants, and a few are shown for central cities of these SMSA's.

PC80-2, Volume 2, Subject Reports—Each of the reports in this volume focuses on a particular subject and provides highly detailed distributions and cross-classifications on a national, regional, and divisional level. A few reports show statistics for States, SMSA's, large cities, American Indian reservations, or Alaska Native villages. Separate reports are issued on such subjects as racial and ethnic groups, type of residence, fertility, families, marital status, migration, education, employment, occupation, industry, journey to work, income, poverty status, and other topics.

PC80-S1, Supplementary Reports—These reports present special compilations of

1980 census statistics dealing with specific population subjects.

Housing Census Reports

HC80-1, Volume 1, Characteristics of Housing Units—This volume presents final housing unit counts and statistics on housing characteristics. It consists of reports for the following 57 areas: the United States, each of the 50 States, the District of Columbia, Puerto Rico, and the Outlying Areas—Guam, the Virgin Islands of the United States, American Samoa, and the Northern Mariana Islands and the remainder of the Trust Territory of the Pacific Islands. The volume consists of two chapters for each area, chapters A and B. Chapter A presents data collected on a complete-count basis, and chapter B presents estimates based on sample information, except for the Outlying Areas where all data were collected on a complete-count basis.

The housing totals presented in this report may differ from the counts presented earlier in the PHC80-V reports because corrections were made for errors found after the PHC80-V reports were issued. Both chapters present statistics by race and Spanish origin for areas with at least a specified number of the relevant population group.

The U.S. Summary reports present statistics for the United States, regions, divisions, States, and selected areas below the State level. The State or equivalent Area reports (which include the District of Columbia, Puerto Rico, and the Outlying Areas) present statistics for the State or equivalent area and its subdivisions.

Statistics for each of the 57 areas are issued in separate paperbound reports of chapters A and B.

HC80-1-A, Chapter A, General Housing Characteristics—Statistics on units at address, tenure, condominium status, number of rooms, persons per room, plumbing facilities, value, contract rent, and vacancy status are shown for some or all of the following areas or their equivalents: States, counties, county subdivisions, places of 1,000 or more inhabitants, SCSA's, SMSA's, urbanized areas, American Indian reservations, and Alaska Native villages. Selected tables contain housing characteristics by urban and rural residence.

HC80-1-B, Chapter B, Detailed Housing Characteristics—Statistics on units in structure, year moved into unit, year structure built, heating equipment, fuels, air-conditioning, source of water, sewage disposal, gross rent, and selected monthly ownership costs are shown for some or all of the following areas or their equivalents: States, counties, places of 2,500 or more inhabitants, SCSA's, SMSA's, urbanized areas, American Indian reservations, and Alaska Native villages. Selected tables show housing characteristics for rural and rural farm residence at the State and county level. Some subjects included in the HC80-1-A reports are also covered in this report in more detail.

HC80-2, Volume 2, Metropolitan Housing Characteristics—This volume presents statistics on most of the 1980 housing census subjects in considerable detail and cross-classification. Most statistics are presented by race and Spanish origin for areas with at least a specified number of the relevant population group. Data are shown for States or equivalent areas, SMSA's and their central cities, and other cities of 50,000 or more inhabitants.

There is one report for each SMSA and one report for each State and Puerto Rico. The set includes a U.S. Summary report showing these statistics for the United States and regions.

HC80-3, Volume 3, Subject Reports—Each of the reports in this volume focuses on a particular subject and provides highly detailed distributions and cross-classifications on a national, regional, and divisional level. Separate reports are issued on housing of the elderly, mobile homes, and American Indian households.

HC80-4, Volume 4, Components of Inventory Change—This volume consists of two reports presenting statistics on the 1980 characteristics of housing units which existed in 1973, as well as on newly constructed units, conversions, mergers, demolitions, and other additions and losses to the housing inventory between 1973 and 1980. These reports present data derived from a sample survey conducted in the fall of 1980. Data are presented for the United States and regions in report I. Report II has two parts: Part A presents data for that group of SMSA's (not individually identified)

with populations of 1 million or more at the time of the 1970 census, and part B presents data for that group of SMSA's (not individually identified) with populations of less than 1 million at the time of the 1970 census.

HC80-5, Volume 5, Residential Finance—This volume consists of one report presenting statistics on the financing of non-farm homeowner and rental and vacant properties, including characteristics of the mortgage, property, and owner. The statistics are based on a sample survey conducted in the spring of 1981. Data are presented for the United States and regions. Some data are presented by inside and outside SMSA's and by central cities.

HC80-S1-1, Supplementary Reports—These reports present statistics from the 1980 Census of Housing on general characteristics of housing units for the 50 States and the District of Columbia, counties, and independent cities.

Evaluation and Reference Reports

PHC80-E, Evaluation and Research Reports—These reports present the results of the extensive evaluation program conducted as an integral part of the 1980 census. This program relates to such matters as completeness of enumeration and quality of the data on characteristics.

PHC80-R, Reference Reports—These reports present information on the various administrative and methodological aspects of the 1980 census. The series includes:

PHC80-R1, Users' Guide—This report covers subject content, procedures, geography, statistical products, limitations of the data, sources of user assistance, notes on data use, a glossary of terms, and guides for locating data in reports and tape files. The guide is issued in loose-leaf form and sold in parts (R1-A, B, etc.) as they are printed.

PHC80-R2, History—This report describes in detail all phases of the 1980 census, from the earliest planning through all stages to the dissemination of data and evaluation of results. It contains detailed discussion of 1980 census questions and their use in previous decennial censuses.

PHC80-R3, Alphabetical Index of Industries and Occupations—This report was developed primarily for use in classifying responses to the questions on the kind of business (industry) and kind of work (occupation) in which the respondent is engaged. The index lists approximately 20,000 industry and 29,000 occupation titles in alphabetical order.

PHC80-R4, Classified Index of Industries and Occupations—This report defines the industrial and occupational classification systems adopted for the 1980 Census of Population. It presents the individual titles that constitute each of the 231 industry and 503 occupation categories in the classification systems. The individual titles are the same as those shown in the Alphabetical Index. The 1980 occupation classification reflects the new U.S. Standard Occupational Classification (SOC). As in the past, the 1980 industry classification reflects the Standard Industrial Classification (SIC).

PHC80-R5, Geographic Identification Code Scheme—This report identifies the names and related geographic codes for each State, county, minor civil division, place, region, division, SCSA, SMSA, American Indian reservation, and Alaska Native village for which the Census Bureau tabulated data from the 1980 census.

COMPUTER TAPES

Summary Tape Files

In addition to the printed and microfiche reports, results of the 1980 census also are provided on computer tape in the form of summary tape files (STF's). These data products have been designed to provide statistics with greater subject and geographic detail than is feasible or desirable to provide in printed and microfiche reports. The STF data are made available at nominal cost. The data are subject to suppression of certain detail where necessary to protect confidentiality.

There are five STF's (listed below), and the amount of geographic and subject detail presented varies. STF's 1 and 2 contain complete-count data, and STF's 3, 4, and 5 contain sample data. Note that the term "cells" used below refers

to the number of subject statistics provided for each geographic area, and the number of cells is indicative of the detail of the subject content of the file.

Each of the STF's generally consists of two or more files which provide different degrees of geographic detail and, in some cases, race/Spanish origin cross-classification. For each of the files there is a separate tape or tapes for each State, the District of Columbia, and Puerto Rico. Selected files (STF 1 and STF 3) are also produced for Guam, the Virgin Islands of the United States, American Samoa, and the Northern Mariana Islands and the remainder of the Trust Territory of the Pacific Islands. These tapes are issued on a State-by-State basis and are followed by a national summary tape for the particular file. More complete descriptions of the STF's than given in the summaries below can be found in the technical documentation of the specific file and in the PHC80-R1, *Users' Guide*.

STF 1—This STF provides 321 cells of complete-count population and housing data. Data are summarized for the United States, regions, divisions, States, SCSA's, SMSA's, urbanized areas, congressional districts, counties, county subdivisions, places, census tracts, enumeration districts in unblocked areas, and blocks and block groups in blocked areas. The data include those shown in the PHC80-1, PHC80-3 (complete-count), and PC80-1-A reports.

STF 2—This STF contains 2,292 cells of detailed complete-count population and housing data, of which 962 are repeated for each race and Spanish origin group present in the tabulation area. Data are summarized for the United States, regions, divisions, States, SCSA's, SMSA's, urbanized areas, counties, county subdivisions, places of 1,000 or more inhabitants, census tracts, American Indian reservations, and Alaska Native villages. The data include those shown in the PHC80-2 (complete-count), PC80-1-B, and HC80-1-A reports.

STF 3—This STF contains 1,126 cells of data on various population and housing subjects collected on a sample basis. The areas covered are the same as in STF 1, excluding blocks. The data include those shown in the PHC80-3 (sample) reports.

STF 4—This STF is the geographic counterpart of STF 2, but the number of cells of data is greater (approximately 8,400). STF 4 provides data covering virtually all of the population and housing subjects collected on a sample basis, as well as some of the complete-count subjects. Some of the statistics are repeated for race, Spanish origin, and ancestry groups. Data are summarized for areas similar to those shown in STF 2, except that data for places are limited to those with 2,500 or more inhabitants. The data include those shown in the PHC80-2 (sample), PC80-1-C, and HC80-1-B reports.

STF 5—This STF contains over 100,000 cells of data on various population and housing subjects collected on a sample basis and provides detailed tabulations and cross-classifications for States, SMSA's, counties, cities of 50,000 or more inhabitants and central cities. Most subjects are classified by race and Spanish origin. The data include those shown in the PC80-1-D and HC80-2 reports.

Other Computer Tape Files

P.L. 94-171, Population Counts—In accordance with Public Law (P.L.) 94-171, the Census Bureau provides population tabulations to all States for legislative reapportionment/redistricting. The file is issued on a State-by-State basis. It contains population counts classified by race and Spanish origin. The data are tabulated for the following levels of geography as applicable: States, counties, county subdivisions, incorporated places, census tracts, blocks and block groups in blocked areas, and enumeration districts in unblocked areas. For States participating in the voluntary program to define election precincts in conjunction with the Census Bureau, the data are also tabulated for election precincts.

Master Area Reference Files 1 and 2 (MARF)

MARF 1—This geographic reference file is an extract of STF 1 designed for those who require a master list of geographic codes and areas, along with basic census counts arranged hierarchically from the State down to the block group and enumeration district levels and is issued on a State-by-State basis. The file contains records for States, counties, county subdivisions, places, census tracts, enumeration districts in unblocked areas, and block groups in blocked areas. Each record shows the total population by five race groups, population of Spanish origin, number of housing units, number of households, number of families, and a few other items.

MARF 2—This file is the same as the MARF 1 with the latitude and longitude coordinates for a representative point (centroid) in each block group (BG) or enumeration district (ED) outside block numbered areas.

Geographic Base File/Dual Independent Map Encoding (GBF/DIME)—These files are computer representations of the Metropolitan Map Series, including address ranges and ZIP Codes, which generally cover the urbanized portions of SMSA's. GBF/DIME files are used to assign census geographic codes to addresses (geocoding). The files are available by SMSA.

Public-Use Microdata Samples—Public-use microdata samples are computerized files containing most population and housing characteristics as shown on a sample of individual census records. These files contain no names or addresses, and geographic identification is sufficiently broad to protect confidentiality.

There are three mutually exclusive samples, the A sample including 5 percent of all persons and housing units, and the

B and C samples each including 1 percent of all persons and housing units. States and most large SMSA's will be identifiable on one or more of the files. Microdata files allow the user to prepare customized tabulations.

Census/EEO Special File—This file provides sample census data with specified relevance to EEO and affirmative action uses. The file contains two tabulations, one with detailed occupational data and the other with years of school completed by age. The data in both tabulations are crossed by sex, race, and Spanish origin. These data are provided for all counties, for all SMSA's, and for places with a population of 50,000 or more.

MAPS

Maps necessary to define areas are generally published and included as part of the corresponding reports. Maps are published for Block Statistics (PHC80-1) and Census Tracts (PHC80-2), but must be purchased separately from the report. Maps necessary to define enumeration districts are available on a cost-of-reproduction basis.

MICROFICHE

Some of the computer tape products are available on microfiche. The STF microfiche are issued for each State or Area and for the United States. These include:

STF 1 Microfiche—Data from STF 1 are presented in tabular form for all the STF 1 geographic levels described previously, except blocks.

STF 3 Microfiche—Data from STF 3 are presented in tabular form for all the STF 3 geographic levels.

P.L. 94-171 Counts Microfiche—The data from the P.L. 94-171 computer file are presented in a listing format.

1980 Census of Population and Housing

Users' Guide

The Users' Guide, a reference work on the 1980 census, is now available. It consists of:

- **Part A. Text**—Covers census data subjects; geographic considerations; reports, tapes, maps, and other products; services available to users; and many other topics central to understanding and using 1980 census data.
- **Part B. Glossary**—Provides detailed definitions of population, housing, geographic, and technical terms associated with the census—especially important for people using 1980 data on tape or microfiche.
- **Sources of Assistance**—Furnishes addresses and phone numbers of public and private sector organizations offering a variety of products and services, such as tape processing, area profiles, training, and reference assistance.
- **Updates**—Provide information on new developments relating to the 1980 census. Each update is keyed to the particular point in "Part A. Text" that needs revision.

Part C, a table finder, and Part D, a guide to tape contents, are planned for publication later.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Specify the stock number (S/N) given below and make checks payable to Superintendent of Documents.

Part A. Text (S/N 003-024-03625-8)—\$5.50. Supplement 1 (S/N 003-024-05004-8)—\$6.00 (includes Part B. Glossary, Sources of Assistance, and Updates)
